LEGAL DESCRIPTION OF AUTHORIZED PLACE OF USE

All that real property situated in Section 32, T. 9 N., R. 31 E.W.M, Walla Walla County, Washington, more particularly described as follows:

Beginning at the southwest corner of said section 32, thence along said section line S. 89°59'35" E., 2104.79 feet to a point of intersection with the centerline of the Columbia Basin Project lateral BP canal; thence N. 36°11'46" W., along the centerline of said canal, 37.18 feet to a point on the northern margin of State Highway 124, being the true point of beginning; thence continuing along centerline of said canal, N. 36°11'46" W., 39.90 feet to a tangent curve; thence 72.50 feet along the arc of a curve to the right having a radius of 100.00 feet, through a central angle of 41°32'15" to a point of tangency; thence N. 05°20'29" E., 120.80 feet to a tangent curve; thence 33.60 feet along the arc of a curve to the left having a radius of 150.00 feet, through a central angle of 12°50'02" to a point of tangency; thence leaving said

canal centerline N. 82°30'27" E., 75.00 feet; thence S. 51°53'40" E., 150.26 feet; thence S. 06°54'46" W., 172.68 feet to a point on the northern margin of State Highway 124; thence along said margin N. 89°59'35" W., 140.00 feet to the true point of beginning, containing 1.00 acres more or less.

Proposed Works

The water system is comprised of a well, a 3 hp pump, and a 250 gallon pressure tank.

Development Schedule

BEGIN PROJECT	COMPLETE PROJECT	PUT WATER TO FULL USE
Began	Completed	December 1, 2012

Measurement of Water Use

How often must water use be measured?	Bi-weekly
How often must water use data be reported to Ecology?	Annually (Jan 31)
What volume should be reported?	Total Annual Volume
What rate should be reported?	Annual Peak Rate of Withdrawal (gpm)

Bi-weekly means every two weeks

Provisions

Water Service Contract

Use of water under this permit or certificate is contingent upon the applicant's compliance with a water service contract with Ecology for recovery of costs associated with the Lake Roosevelt Incremental Storage Releases Program. Failure to comply with the terms of the water service contract will result in cancellation of the permit or revocation of the certificate.

Wells, Well Logs and Well Construction Standards

All wells constructed in the state shall meet the construction requirements of WAC 173-160 titled "Minimum Standards for the Construction and Maintenance of Wells" and RCW 18.104 titled "Water Well Construction". Any well which is unusable, abandoned, or whose use has been permanently discontinued, or which is in such disrepair that its continued use is impractical or is an environmental, safety or public health hazard shall be decommissioned.

All wells shall be tagged with a Department of Ecology unique well identification number. If you have an existing well and it does not have a tag, please contact the well-drilling coordinator at the regional Department of Ecology office issuing this decision. This tag shall remain attached to the well. If you are required to submit water measuring reports, reference this tag number.

Installation and maintenance of an access port as described in WAC 173-160- 291(3) is required.

Measurements, Monitoring, Metering and Reporting

An approved measuring device must be installed and maintained for each of the sources identified by this water right in accordance with the rule "Requirements for Measuring and Reporting Water Use", WAC 173-173, which describes the requirements for data accuracy, device installation and operation, and information reporting. It also allows a water user to petition the Department of Ecology for modifications to some of the requirements.

Recorded water use data shall be submitted via the Internet. To set up an Internet reporting account, contact the Central Regional Office. If you do not have Internet access, you can still submit hard copies by contacting the Central Regional Office for forms to submit your water use data.

Water Use Efficiency
The water right holder is required to maintain efficient water delivery systems and use of up-to-date water conservation practices consistent with RCW 90.03.005.

Proof of Appropriation
The water right holder shall file the notice of Proof of Appropriation of water (under which the certificate of water right is issued) when the permanent distribution system has been constructed and the quantity of water required by the project has been put to full beneficial use. The certificate will reflect the extent of the project perfected within the limitations of the permit. Elements of a proof inspection may include, as appropriate, the source(s), system instantaneous capacity, beneficial use(s), annual quantity, place of use, and satisfaction of provisions.

Schedule and Inspections
Department of Ecology personnel, upon presentation of proper credentials, shall have access at reasonable times, to the project location, and to inspect at reasonable times, records of water use, wells, diversions, measuring devices and associated distribution systems for compliance with water law.

This Permit Subject to Cancellation
This permit shall be subject to cancellation should the permittee fail to comply with the above development schedule and/or to give notice to the Department of Ecology on forms provided by the Department documenting such compliance.

Given under my hand and the seal of this office at Yakima, Washington this 13TH day of April, 2012.
