2011 Technical Report for the

Columbia River Basin

Long-Term Water Supply and Demand Forecast

Submitted Pursuant to RCW 90.90.040 by:

DEPARTMENT OF ECOLOGY State of Washington

in collaboration with

WASHINGTON STATE UNIVERSITY

Publication No. 12-12-001

This publication is available on the Department of Ecology website at:
http://www.ecy.wa.gov/biblio/12-12-001

For additional copies of this publication,

Contents

1.0 Introduction to the Long-Term Forecast 1

1.1 Project Overview 3

1.2 Study Objectives 4

1.3 Definitions of Water Supply and Demand Used in the 2011 Forecast 6

1.3.1 Water Supply Definitions 6

1.3.2 Water Demand Definitions 7

1.4 Approach Synopsis 8

1.4.1 Overview of the University of Washington Water Supply Forecast and Relationship to WSU Forecast 8

1.4.2 Computer Modeling 8

1.4.2.1 Modeling Water Supply 10

1.4.2.2 Modeling Agricultural Water Demand 12

1.4.2.3 Economic Analysis of Changes in Agricultural Production 13

1.4.2.4 Economic Analysis of Changes in Water Capacity and Cost Recovery for Development Costs of New Water Capacity 14

1.4.2.5 Forecast of Municipal Water Demand 15

1.4.2.6 Model Outputs 17

1.4.3 Incorporation of Instream Flow Rules and Assessment of Current Conditions for ESA-Listed Fish Stocks 17

1.4.4 Forecast of Hydropower Water Demand 19

2.0 Background 21

2.1 Study Area 21

2.2 Existing Conditions within the Columbia River Basin 22

2.2.1 Climate 22

2.2.2 Streamflows and Water Supplies 23

2.2.2.1 Surface Water 23

2.2.2.2 Groundwater 25

2.2.3 Agriculture 29

2.2.4 Municipal 29

2.2.5 Hydropower 30

2.2.6 Ecosystem and Instream Flow Requirements 30

2.3 Summary of 2006 Forecast 33

2.3.1 Estimates of Existing Demand 33

2.3.1.1 Analysis of Current Water Rights on the Columbia River Mainstem 33
2.3.1.2 Analysis of Current Water Use in the Columbia River Basin 35
2.3.2 Forecast of Future Demand 36
2.3.2.2 Projections of Future Water Use for Agriculture and Domestic/Municipal 37
2.4 Overview of Anticipated Future Climate Conditions and Impacts 38
2.4.1 Current Evidence of Climate Change 38
2.4.2 Anticipated Future Changes Due to Climate Change 40
3.0 Methodology 42
3.1 Data Sources for Integrated Modeling 42
3.1.1 Climate 42
3.1.1.1 Historical Climate Scenario 42
3.1.1.2 Future Climate Scenarios 42
3.1.2 Land Cover 43
3.1.2.1 Washington State Department of Agriculture Information 44
3.1.2.2 United States Department of Agriculture (USDA) Information 45
3.1.2.3 Crop Yield 45
3.1.2.4 CropSyst Parameters for Crops 46
3.1.3 Soils 46
3.1.3.1 VIC Soils 46
3.1.3.2 CropSyst Soils 46
3.1.4 Water Management 46
3.1.4.1 Water Rights 46
3.1.4.2 Instream Flow Rules 47
3.1.4.3 Reservoir Operations 48
3.1.5 Streamflow 48
3.1.5.1 Naturalized Flows 48
3.1.6 Diversions 48
3.1.7 Municipal Demand 48
3.1.7.1 Municipal Data Sources 48
3.1.7.2 Per Capita Water Usage 49
3.1.7.3 Consumptive Use and Waste Water Treatment Plant Return Flows 49
3.1.7.4 Integration with VIC-CropSyst Modeling 49
3.2 Economic Forecasting 50

3.2.1 Global vs. Regional Commodities 52
3.2.1.1 Global Commodities 52
3.2.1.2 Regional Commodities 54
3.2.2 Population and Income Forecasts 56
3.2.3 Trade 56
3.2.4 Regional Water Policy Scenarios: Water Capacity Development and Cost Recovery 58
3.2.4.1 Economics of Water Use for Irrigation 58
3.2.4.2 Water Capacity Scenarios 61
3.2.4.3 Water Pricing for Cost Recovery 65
3.3 Overview of the University of Washington Water Supply Forecast, and Relationship to WSU Efforts 67
3.4 Integrated Modeling Framework 68
3.4.3 Overall Modeling Framework 68
3.4.4 Descriptions of Biophysical Modeling Components 69
3.4.4.1 Hydrologic Model, VIC 69
3.4.4.2 Cropping Systems Model, CropSyst 70
3.4.4.3 Reservoir Model, ColSim 71
3.4.5 VIC-CropSyst Integration 73
3.4.6 Integration with Water Management 76
3.4.6.1 Bias Correction 76
3.4.6.2 Reservoirs 77
3.4.6.3 Curtailment 77
3.4.6.4 Separating irrigation demand into surface water withdrawal sources and groundwater withdrawal sources 77
3.4.7 Integration of Biophysical and Economic Modeling 78
3.4.7.1 Long-Run Producer Response to domestic economic growth and international trade 78
3.4.7.2 Short-Run Producer Response (Selective Deficit Irrigation) 79
3.4.8 Calibration and Evaluation 80
3.4.8.1 Hydrology 80
3.4.8.2 Calibration of Yield Using NASS Statistics 80
3.4.8.3 Phenology Adjustments Due to Temperature Issues 80
3.4.8.4 Conveyance Losses 81

3.5 Modeling Application ... 82
3.5.1 Water Supply Forecast ... 83
3.5.2 Water Demand Forecast ... 83
3.5.3 Simulation Scenarios ... 84
3.5.3.1 Climate ... 84
3.5.3.2 Economics ... 84
3.5.3.3 Water Management (water capacity and water pricing) ... 84
3.5.4 Wet/Dry/Average Quantification ... 84
3.6 Survey of Regional Water Supply Changes ... 84
3.7 Hydropower Demand Assessment ... 85
3.7.1 Review of Power Planning Strategies ... 90
3.7.2 Review of FERC Licenses ... 90
3.8 Instream Demand Assessment ... 92
3.8.1 Instream Flows Across the Columbia River Basin ... 92
3.8.2 Instream Flows in Washington State ... 93
3.9 Water Allocation Assessment ... 94
3.10 Outreach ... 95
3.10.1 National Review Panel ... 96
3.10.2 Regional Review Panel ... 96
3.10.3 Office of Columbia River Policy Advisory Group ... 97
3.10.4 Public Stakeholder Workshops and Public Comment ... 98
4.0 Summary of Significant Findings ... 101
4.1 Surface Water Supply in the Columbia River Basin ... 101
4.2 Cumulative Water Demands in the Washington State Portion of the Columbia River Basin ... 102
4.3 Water Demands in the Columbia River Basin by Sector ... 105
4.3.1 Agricultural Water Demands ... 105
4.3.2 Municipal Water Demands ... 108
4.3.3 Instream Water Demands ... 109
4.3.4 Hydropower Demands ... 110
4.4 Water Demands in Washington State Watersheds ... 110
4.5 Surface Water Supply and Demand on Washington's Columbia River Mainstem ... 110
4.6 Conclusion ... 111

5.0 Tier I Results - Columbia River Basin 112
5.1 Water Supplies Entering Washington 113
5.1.1 Modeled Surface Water Supplies Entering Washington 113
5.1.2 Columbia River Basin Surface Water Supply and Seasonal Availability 115
5.1.3 Regional Survey Results 116
5.1.3.1 Survey Results Regarding Water Supply and Demand 116
5.1.3.2 Survey Results: Water Development Projects 117
5.1.3.3 Survey Results: Managing Jurisdictional Water Supplies 118
5.2 Water Demand Forecast 119
5.2.1 Columbia River Basin Agricultural Water Demand 119
5.2.1.1 Impact of Variation in Assumptions about Economic Growth and Trade on Water Demand in Washington 120
5.2.1.2 Impact of Additional Water Capacity Development and Cost Recovery for New Water Provision on Forecast 2030 Irrigation Water Demand in Washington 121
5.2.2 Columbia River Basin Municipal Water Demand 125
5.2.3 Columbia River Basin Instream Water Demand 126
5.2.3.1 Minimum Flows in the Columbia River Basin 126
5.2.3.2 Summary of Theoretical Minimum Flows Set by Statute or Dam Operating Criteria for the Columbia River and Major Tributaries Entering WA 142
5.2.3.3 Instream Flows in Washington State 147
5.2.4 Columbia River Basin Hydropower Water Demand 148
5.2.4.1 Columbia River Treaty Review, Phase 1 Report 148
5.2.4.2 Sixth Northwest Power Plan 150
5.2.4.3 Avista's Electric Integrated Resource Plan 151
5.2.4.4 Idaho Power's 2011 Integrated Resource Plan 152
5.2.4.5 Portland General Electric's Integrated Resource Plan 152
5.2.4.6 British Columbia Hydro and Power Authority's Electric Load Forecast 153
5.2.4.7 Washington Public Utility Districts 153
5.2.4.8 Review of FERC Licenses 156
5.2.4.9 Conclusions of Hydropower Forecast 157
5.3 Impact of Deficit Irrigation on Crop Yield and Production Value 158
5.3.1 Impacts of Deficit Irrigation on Crop Yield 158
5.3.2 Impact of Deficit Irrigation on Production Value 162

6.0 Tier II Results – Water Resource Inventory Area (WRIA) Level Results 163
6.1 Surface Water Supplies in Washington Watersheds 164
6.2 Out-of-Stream Water Demands in Washington Watersheds..... 166
6.3 Instream Water Demands in Washington Watersheds 171
6.4 Unmet Demand in Washington Watersheds 171
6.6 WRIAs 29a, Wind, and 29b, White Salmon..... 173
6.6.1 WRIA 29 Water Supply Forecast 174
6.6.2 WRIA 29 Water Demand Forecast, including Demand under Alternate Economic Scenarios 175
6.6.3 WRIA 29 Demand under Additional Water Capacity Scenarios..... 176
6.6.5 WRIA 29 Supply versus Demand Comparison 177
6.6.5.1 WRIA 29 Curtailment Analysis (for applicable WRIAs)..... 177
6.6.6 WRIA 29 Water Allocation Analysis..... 178
6.6.7 WRIA 29 Management Context 179
6.7 WRIA 30, Klickitat 180
6.7.1 WRIA 30 Water Supply Forecast 181
6.7.2 WRIA 30 Water Demand Forecast, including Demand under Alternate Economic Scenarios 182
6.7.3 WRIA 30 Demand under Additional Water Capacity Scenarios..... 183
6.7.4 WRIA 30 Supply versus Demand Comparison 184
6.7.4.1 WRIA 30 Curtailment Analysis (for applicable WRIAs)..... 184
6.7.5 WRIA 30 Water Allocation Analysis..... 184
6.7.6 WRIA 30 Management Context 186
6.8 WRIA 31, Rock-Glade 187
6.8.1 WRIA 31 Water Supply Forecast 188
6.8.2 WRIA 31 Water Demand Forecast, Including Demand under Alternate Economic Scenarios 189
6.8.3 WRIA 31 Demand under Additional Water Capacity Scenarios..... 190
6.8.4 WRIA 31 Supply versus Demand Comparison 191
6.8.4.1 WRIA 31 Curtailment Analysis (for applicable WRIAs)..... 191
6.8.5 WRIA 31 Water Allocation Analysis..... 191
6.8.6 WRIA 31 Management Context 193
6.9 WRIA 32, Walla Walla 194
6.9.1 WRIA 32 Water Supply Forecast 195

6.9.2 WRIA 32 Water Demand Forecast, including Demand under Alternate Economic Scenarios 196
6.9.3 WRIA 32 Demand under Additional Water Capacity Scenarios 197
6.9.4 WRIA 32 Supply versus Demand Comparison 198
6.9.4.1 WRIA 32 Curtailment Analysis (for applicable WRIAs) 198
6.9.5 WRIA 32 Water Allocation Analysis 199
6.9.6 WRIA 32 Management Context 200
6.10 WRIA 33, Lower Snake 201
6.10.1 WRIA 33 Water Supply Forecast 202
6.10.2 WRIA 33 Water Demand Forecast, including Demand under Alternate Economic Scenarios 203
6.10.3 WRIA 33 Demand under Additional Water Capacity Scenarios 204
6.10.4 WRIA 33 Supply versus Demand Comparison 205
6.10.4.1 WRIA 33 Curtailment Analysis (for applicable WRIAs) 205
6.10.5 WRIA 33 Water Allocation Analysis 206
6.10.6 WRIA 33 Management Context 207
6.11 WRIA 34, Palouse 208
6.11.1 WRIA 34 Water Supply Forecast 209
6.11.2 WRIA 34 Water Demand Forecast, including Demand under Alternate Economic Scenarios 210
6.11.3 WRIA 34 Demand under Additional Water Capacity Scenarios 211
6.11.4 WRIA 34 Supply versus Demand Comparison 212
6.11.4.1 WRIA 34 Curtailment Analysis (for applicable WRIAs) 212
6.11.5 WRIA 34 Water Allocation Analysis 213
6.11.6 WRIA 34 Management Context 214
6.12 WRIA 35, Middle Snake 215
6.12.1 WRIA 35 Water Supply Forecast 216
6.12.2 WRIA 35 Water Demand Forecast, including Demand under Alternate Economic Scenarios 217
6.12.3 WRIA 35 Demand under Additional Water Capacity Scenarios 218
6.12.4 WRIA 35 Supply versus Demand Comparison 219
6.12.4.1 WRIA 35 Curtailment Analysis (for applicable WRIAs) 219
6.12.5 WRIA 35 Water Allocation Analysis 220
6.12.6 WRIA 35 Management Context 221

6.13 WRIA 36, Esquatzel Coulee 222
6.13.1 WRIA 36 Water Supply Forecast 223
6.13.2 WRIA 36 Water Demand Forecast, including Demand under Alternate Economic Scenarios 224
6.13.3 WRIA 36 Demand under Additional Water Capacity Scenarios 225
6.13.4 WRIA 36 Supply versus Demand Comparison 226
6.13.4.1 WRIA 36 Curtailment Analysis (for applicable WRIAs) 226
6.13.5 WRIA 36 Water Allocation Analysis 227
6.13.6 WRIA 36 Management Context 228
6.14 WRIAs 37, 38, 39 Lower Yakima, Naches, Upper Yakima 229
6.14.1 WRIAs 37, 38, 39 Water Supply Forecast 230
6.14.2 WRIAs 37, 38, 39 Water Demand Forecast, including Demand under Alternate Economic Scenarios 231
6.14.3 WRIAs 37, 38, 39 Demand under Additional Water Capacity Scenarios 232
6.14.4 WRIAs 37, 38, 39 Supply versus Demand Comparison 233
6.14.4.1 WRIAs 37, 38, 39 Curtailment Analysis (for applicable WRIAs) 233
6.14.5 WRIAs 37, 38, 39 Water Allocation Analysis 234
6.14.6 WRIAs 37, 38, 39 Management Context 235
6.15 WRIA 40/40a, Alkali-Squilchuck and Stemilt Squilchuck 236
6.15.1 WRIA 40/40a Water Supply Forecast 237
6.15.2 WRIA 40/40a Water Demand Forecast, including Demand under Alternate Economic Scenarios 238
6.15.3 WRIA 40/40a Demand under Additional Water Capacity Scenarios 239
6.15.4 WRIA 40/40a Supply versus Demand Comparison 240
6.15.4.1 WRIA 40/40a Curtailment Analysis (for applicable WRIAs) 240
6.15.5 WRIA 40/40a Water Allocation Analysis 241
6.15.6 WRIA 40/40a Management Context 242
6.16 WRIA 41, Lower Crab 243
6.16.1 WRIA 41 Water Supply Forecast 244
6.16.2 WRIA 41 Water Demand Forecast, including Demand under Alternate Economic Scenarios 245
6.16.3 WRIA 41 Demand under Additional Water Capacity Scenarios 246
6.16.4 WRIA 41 Supply versus Demand Comparison 247
6.16.4.1 WRIA 41 Curtailment Analysis (for applicable WRIAs) 247

6.16.5 WRIA 41 Water Allocation Analysis 248
6.16.6 WRIA 41 Management Context 249
6.17 WRIA 42, Grand Coulee 250
6.17.1 WRIA 42 Water Supply Forecast 251
6.17.2 WRIA 42 Water Demand Forecast, including Demand under Alternate Economic Scenarios 252
6.17.3 WRIA 42 Demand under Additional Water Capacity Scenarios 253
6.17.4 WRIA 42 Supply versus Demand Comparison 254
6.17.4.1 WRIA 42 Curtailment Analysis (for applicable WRIAs) 254
6.17.5 WRIA 42 Water Allocation Analysis 255
6.17.6 WRIA 42 Management Context 256
6.18 WRIA 43, Upper Crab-Wilson 257
6.18.1 WRIA 43 Water Supply Forecast 258
6.18.2 WRIA 43 Water Demand Forecast, including Demand under Alternate Economic Scenarios 259
6.18.3 WRIA 43 Demand under Additional Water Capacity Scenarios 260
6.18.4 WRIA 43 Supply versus Demand Comparison 261
6.18.4.1 WRIA 43 Curtailment Analysis (for applicable WRIAs) 261
6.18.5 WRIA 43 Water Allocation Analysis 262
6.18.6 WRIA 43 Management Context 263
6.19 WRIA 44 and 50, Moses Coulee, Foster 264
6.19.1 WRIAs 44 and 50 Water Supply Forecast 265
6.19.2 WRIAs 44 and 50 Water Demand Forecast, including Demand under Alternate Economic Scenarios 266
6.19.3 WRIAs 44 and 50 Demand under Additional Water Capacity Scenarios 267
6.19.4 WRIAs 44 and 50 Supply versus Demand Comparison 268
6.19.4.1 WRIAs 44 and 50 Curtailment Analysis (for applicable WRIAs) 268
6.19.5 WRIAs 44 and 50 Water Allocation Analysis 269
6.19.6 WRIAs 44 and 50 Management Context 270
6.20 WRIA 45, Wenatchee 271
6.20.1 WRIA 45 Water Supply Forecast 272
6.20.2 WRIA 45 Water Demand Forecast, including Demand under Alternate Economic Scenarios 273
6.20.3 WRIA 45 Demand under Additional Water Capacity Scenarios 274

6.20.4 WRIA 45 Supply versus Demand Comparison 275
6.20.4.1 WRIA 45 Curtailment Analysis (for applicable WRIAs) 275
6.20.5 WRIA 45 Water Allocation Analysis 276
6.20.6 WRIA 45 Management Context 277
6.21 WRIA 46, Entiat 278
6.21.1 WRIA 46 Water Supply Forecast 279
6.21.2 WRIA 46 Water Demand Forecast, including Demand under Alternate Economic Scenarios 280
6.21.3 WRIA 46 Demand under Additional Water Capacity Scenarios 281
6.21.4 WRIA 46 Supply versus Demand Comparison 282
6.21.4.1 WRIA 46 Curtailment Analysis (for applicable WRIAs) 282
6.21.5 WRIA 46 Water Allocation Analysis 283
6.21.6 WRIA 46 Management Context 284
6.22 WRIA 47, Chelan 285
6.22.1 WRIA 47 Water Supply Forecast 286
6.22.2 WRIA 47 Water Demand Forecast, including Demand under Alternate Economic Scenarios 287
6.22.3 WRIA 47 Demand under Additional Water Capacity Scenarios 288
6.22.4 WRIA 47 Supply versus Demand Comparison 289
6.22.4.1 WRIA 47 Curtailment Analysis (for applicable WRIAs) 289
6.22.5 WRIA 47 Water Allocation Analysis 289
6.22.6 WRIA 47 Management Context 291
6.23 WRIA 48, Methow 292
6.23.1 WRIA 48 Water Supply Forecast 293
6.23.2 WRIA 48 Water Demand Forecast, including Demand under Alternate Economic Scenarios 294
6.23.3 WRIA 48 Demand under Additional Water Capacity Scenarios 295
6.23.4 WRIA 48 Supply versus Demand Comparison 296
6.23.4.1 WRIA 48 Curtailment Analysis (for applicable WRIAs) 296
6.23.5 WRIA 48 Water Allocation Analysis 297
6.23.6 WRIA 48 Management Context 298
6.24 WRIA 49, Okanogan 299
6.24.1 WRIA 49 Water Supply Forecast 301
6.24.2 WRIA 49 Water Demand Forecast, including Demand under Alternate Economic Scenarios 302

6.24.3 WRIA 49 Demand under Additional Water Capacity Scenarios 303
6.24.4 WRIA 49 Supply versus Demand Comparison 304
6.24.4.1 WRIA 49 Curtailment Analysis (for applicable WRIAs) 304
6.24.5 WRIA 49 Water Allocation Analysis 305
6.24.6 WRIA 49 Management Context 306
6.25 WRIA 51, Nespelem 307
6.25.1 WRIA 51 Water Supply Forecast 308
6.25.2 WRIA 51 Water Demand Forecast, including Demand under Alternate Economic Scenarios 309
6.25.3 WRIA 51 Demand under Additional Water Capacity Scenarios 310
6.25.4 WRIA 51 Supply versus Demand Comparison 311
6.25.4.1 WRIA 51 Curtailment Analysis (for applicable WRIAs) 311
6.25.5 WRIA 31 Water Allocation Analysis 311
6.25.6 WRIA 51 Management Context 312
6.26 WRIA 52, Sanpoil 313
6.26.1 WRIA 52 Water Supply Forecast 314
6.26.2 WRIA 52 Water Demand Forecast, including Demand under Alternate Economic Scenarios 315
6.26.3 WRIA 52 Demand under Additional Water Capacity Scenarios 316
6.26.4 WRIA 52 Supply versus Demand Comparison 317
6.26.4.1 WRIA 52 Curtailment Analysis (for applicable WRIAs) 317
6.26.5 WRIA 52 Water Allocation Analysis 317
6.26.6 WRIA 52 Management Context 318
6.27 WRIA 53, Lower Lake Roosevelt 319
6.27.1 WRIA 53 Water Supply Forecast 320
6.27.2 WRIA 53 Water Demand Forecast, including Demand under Alternate Economic Scenarios 321
6.27.3 WRIA 53 Demand under Additional Water Capacity Scenarios 322
6.27.4 WRIA 53 Supply versus Demand Comparison 323
6.27.4.1 WRIA 53 Curtailment Analysis (for applicable WRIAs) 323
6.27.5 WRIA 53 Water Allocation Analysis 324
6.27.6 WRIA 53 Management Context 325
6.28 WRIA 54, Lower Spokane 326
6.28.1 WRIA 54 Water Supply Forecast 327

6.28.2 WRIA 54 Water Demand Forecast, including Demand under Alternate Economic Scenarios 328
6.28.3 WRIA 54 Demand under Additional Water Capacity Scenarios 329
6.28.4 WRIA 54 Supply versus Demand Comparison 330
6.28.4.1 WRIA 54 Curtailment Analysis (for applicable WRIAs) 330
6.28.5 WRIA 54 Water Allocation Analysis 330
6.28.6 WRIA 54 Management Context 331
6.29 WRIA 55, Little Spokane 332
6.29.1 WRIA 55 Water Supply Forecast 333
6.29.2 WRIA 55 Water Demand Forecast, including Demand under Alternate Economic Scenarios 334
6.29.3 WRIA 55 Demand under Additional Water Capacity Scenarios 335
6.29.4 WRIA 55 Supply versus Demand Comparison 336
6.29.4.1 WRIA 55 Curtailment Analysis (for applicable WRIAs) 336
6.29.5 WRIA 55 Water Allocation Analysis 337
6.29.6 WRIA 55 Management Context 338
6.30 WRIA 56, Hangman 339
6.30.1 WRIA 56 Water Supply Forecast 340
6.30.2 WRIA 56 Water Demand Forecast, including Demand under Alternate Economic Scenarios 341
6.30.3 WRIA 56 Demand under Additional Water Capacity Scenarios 342
6.30.4 WRIA 56 Supply versus Demand Comparison 343
6.30.4.1 WRIA 56 Curtailment Analysis (for applicable WRIAs) 343
6.30.5 WRIA 56 Water Allocation Analysis 344
6.30.6 WRIA 56 Management Context 345
6.31 WRIA 57, Middle Lake Roosevelt 346
6.31.1 WRIA 57 Water Supply Forecast 347
6.31.2 WRIA 57 Water Demand Forecast, including Demand under Alternate Economic Scenarios 348
6.31.3 WRIA 57 Demand under Additional Water Capacity Scenarios 349
6.31.4 WRIA 57 Supply versus Demand Comparison 350

7.0 Tier III Results – Columbia River Mainstem 385
7.1 Surface Water Supplies Compared to Regulatory and Management Schemes at Key Points along the Columbia River Mainstem 385
7.2 Proportion of WRIA-level Demand along the Columbia River Mainstem 388
7.3 Curtailment along the Columbia River Mainstem 391
8.0 Limitations and Data Gaps 392
8.1 Data Gaps 392
8.1.1 Crop and Irrigation Extent Estimates 392
8.1.2 National Agricultural Statistics Service Statistics - Crop Production Calibration 392
8.1.3 Water Rights Data 392
8.1.4 Interruptible Water Rights 393
8.1.5 Water Rights Subject to Low Flows Defined in WAC 393
8.1.6 Water Rights Subject to Surface Water Source Limitations 394
8.1.7 Curtailment of Junior Water Rights Holders 394
8.1.8 Identifying Interruptible Grid Cells in VIC-CropSyst 394
8.1.9 Sources of Withdrawal and Conveyance Loss Estimates 395
8.2 Modeling Framework Limitations 395
8.2.1 VIC-CropSyst Limitations 395
8.2.2 Municipal Demand Estimates 396
8.2.3 Hydropower Demand Estimates 397
8.2.4 Integrated Biophysical Modeling Limitations 398
8.2.5 Biophysical Model Evaluation 398
8.2.6 Economic Modeling and Biophysical/Economic Integration 399
9.0 Recommended Potential Improvements for 2016 Forecast 400

9.1 Water Management Data Collection and Processing 400
9.1.1 Expand Water Rights Data 400
9.1.2 Collect and Verify Diversion Records 400
9.2 Data Verification and Model Evaluation 400
9.2.1 Verify Irrigated Areas 400
9.2.2 Improve Information on Surface/Groundwater Sources to Understand Conservation Implications 401
9.2.3 Field Verify and Expand Irrigation Practice Information 401
9.2.4 Use Evapotranspiration Remote Sensing Application of Consumptive Use Requirements 401
9.2.5 Expand Model Evaluation 402
9.3 Improvement of Biophysical Modeling 403
9.3.1 Incorporate Deep Groundwater Dynamics 403
9.3.2 Expand Water Right Modeling 404
9.3.3 Evaluate a Variety of Reservoir Management Scenarios 404
9.3.4 Include Effects of Crop Rotation 404
9.3.5 Account for Sensitivity of Forests under Climate Change 405
9.3.6 Improve Population Growth Projections 405
9.4 Improvement of Economic Modeling 405
9.4.1 Include Land Assessments for Expanded Agriculture 405
9.4.2 Provide a Richer Representation of Factors that Influence Agricultural Productivity 405
9.4.3 Expand Economic Model of Agricultural Production to Include the Entire CRB 406
9.4.4 Incorporate Municipal Demand into Economic Modeling 406
9.5 Improvement of Integration between Biophysical and Economic Modeling 406
9.6 Improvement of Modeling Scenarios 406
9.6.1 Update Climate Data 406
9.6.2 Evaluate Conservation Impacts 407
9.6.3 Incorporate Water Marketing in the Economic Analysis 407
9.6.4 Evaluate Potential Impacts of Columbia River Treaty 407
9.6.5 Fisheries Requirements 407
9.7 Additional Integrated Modeling Applications to Improve Forecast 408
9.7.1 Assess Columbia River Treaty Impacts on Supply 408
9.7.2 Conduct Fine-Resolution Modeling Studies over Key Watersheds 408

9.8 Stakeholder Input 409
9.8.1 Expand Collaboration with Conservation Districts and other Local Organizations for Targeted Preliminary Data Collection 409
9.8.2 Conduct Survey of Farm Community 409
10.0 References 411
