WATER QUALITY PROGRAM

1439 Rd. "R" SE
Moses Lake, WA
98837

March 11, 2010

Dear Mr. Jennings:

I was unable to attend the meeting in Moses Lake last week.

I am asking that your committee put human beings ahead of fish. Why should people have their lives damaged due to a lack of using an insecticide that works on adult mosqitoes. It is pure nonsence. Are we educated or not? This is a health issue.

Please allow spraying of adulticide into public water.

Judy Clark
