# AN INTRODUCTION TO CHEMICAL HAZARD ASSESSMENTS

Northwest Green Chemistry and Ecology are offering training to use the Quick Chemical Assessment Tool (QCAT). QCAT lets users with limited resources or expertise evaluate the hazards of chemical ingredients and compare potential alternatives. This tool is great for planners, small businesses, nonprofits, and educational institutions.

In this day-and-a-half workshop, Ecology's Dr. Alex Stone and other experienced instructors will provide an introduction to QCAT and hands-on activities so participants can practice using the tool.

**Register early to suggest a chemical of interest that may be incorporated into the workshop!**

QUICK CHEMICAL ASSESSMENT TOOL

## DETAILS

| | |
|---|---|
| **DATE:** | 8:30 – 4:30, October 1, 2015 &<br>8:30 – noon, October 2, 2015 |
