I am writing in regards to the upcoming permit on 'nuisance mosquito control. We live in a rural area that has a great mosquito problem around our home and yard,. I am greatly allergic to the mosquito bite and suffer when they are not eliminated. We pay for the service to rid us of these pests! I am very upset with the proposed permit which includes the words "Adulticides and their residues used for nuisance mosquito control **must not be discharged** to waters of the state.!

It is ridiculous to say the little puddles and standing water that are on our property be included with "waters" of our state! I have relied on the spray that the Mosquito District provides every year to protect me. They spray a mist at night that is not even noticeable in the air. It angers me to think that this service would be eliminated.

I would like the department to alter the permit to read: **"The Permittee is authorized to discharge incidental amounts of adulticides and their residues to waters of the state for nuisance and vector mosquito control."**
Thank you for your consideration on this matter. I will not be able to be outside during the mosquito season if this proposed permit goes into effect!

Sincerely,
Eileen F. Duncan
