Subject: Ecology Aquatic Mosquito Control NPDES Draft General Permit
Date: Monday, March 15, 2010 6:26:11 PM

Dear Mr. Jennings,

I have serious concerns regarding the wording of the proposed permit. This permit as written will have a significant impact on our community. Not allowing adulticide for mosquitoes will drastically change our communtieis quality of life. Normal everyday outdoor activities such as going for a walk, BBQs, and any outdoor activity will be intolerable because of mosquites.

The following items need to be corrected in the permit to allow our quality of life to remain the same regarding out outdoor activities:

1. Do not separate nuisance and vector mosquitoes, both need to be controlled.
2. Eliminate the use of the term "waters of the state".
3. Change the current language to allow organized mosquito control districts under chapter 17.28 RCW to adulticide to control vector and nuisance mosquitoes as listed in the districts Integrated Pest Management Plan.
4. Eliminate Malathion and Nalid restrictions from the permit.
5. Let them know that you support mosquito control districts. Excessive mosquitoes will impact your health, quality of life, use of parks, recreation and an economic impact on our community.

I ask that you take these concerns seriously, the conditions on this side of the state are significantly different than those of the West side of the state. The permit as currently written will have potentially significant impacts to our quality of life, not to mention the increased health risks.

Thank you for your consideration.

Angie Ensunsa
