I am a resident of Benton County and live near the Yakima River. During the summer months we frequently call on the local mosquito control agency to spray around our home and appreciate their efforts to control the mosquito problem in the area. This control effort allows us to live outside during the summer and any efforts to curtail this effort would be an major impact on our quality of life (and the impact of controlling the spread of West Nile virus). Therefore we ask that that you permit the Benton County Mosquito Control agency to continue their efforts as they have in the past and therefore permit them to discharge incidental amounts of adulticides and their residues to waters of the state for nuisance mosquito control.
Thank you.
