Dear Sir:

I am responding to the new retstrictions on control of nuisance mosquitoes. I live near the Yakima River in Benton County. During certain periods of time in the summer and fall, it is impossible to stay outside of our home for more than a few minutes due to the thick swarms of mosquitoes. I suggest that the permittee be authorized to discharge incidental amounts of adulticides and their residues to waters of the state for nuisance and vector mosquito control. Alternatively, control these pests before they become adults with benign biologic cidal compounds.

Thank you.
