Report 3

Attachment A Signatory Page 5

Attachment B
Aquatic Pesticide Application Quick Noxious Weed Report printout 6

REPORT

For the required summary of herbicide applications refer to Attachment B. Attachment B contains a hardcopy, summary printout of aquatic pesticides applied under NPDES Permit WAG-993000 as reported to the Department of Ecology (DOE) database by entities or applicators that received permit coverage through the Washington State Department of Agriculture (WSDA) administration of the permit.

Attachment A includes those requests that WSDA accepted and subsequently extended coverage; requests that WSDA denied in writing; and requests that were entered into the database for which WSDA never received a signed hardcopy request for coverage.

Under permit WAG-993000, WSDA extended coverage to 102 entities during the 2005 calendar year.

Twenty-two requests for coverage during the same period were specifically denied by the WSDA. Some denials involved multiple requests for coverage, therefor the database ID numbers associated with denied requests are listed individually:

2797	2854
2821	2856
2822	2857
2824	2863
2827**	2864
2832	2885
2833	2991**
2837	2992**
2840	3010*
2845	3015
2849	3035**
2852	3038**

*original request denied, municipality reapplied under same ID number and was approved.
**numbers no longer appear in DOE database, however letters of denial were issued.

No action was taken on database requests for which no hardcopy requests were submitted to WSDA. For example, a substantial number of requests were submitted to the DOE database by private entities listing Northwest Aquatic Ecosystems under the "applicator" field for which signed, hardcopies were never received by WSDA. For these cases there is neither an extension of coverage nor a denial of coverage.

All actively denied requests and unexecuted requests continue to list estimates in the database.

Coverage extended under ID 2997 still lists estimates, as the applicant is unable to access the database. WSDA has the spray records for ID 2997 and will enter actuals pending further review. Based on initial review, actuals are not expected to exceed estimates. Similarly, WSDA is reviewing spray records submitted by entities listing Aquatechnex as the applicator and will update those estimates with actuals. Based on initial review, actuals are not expected to exceed estimates. WSDA does not have spray records or actuals reported to the database for coverages under ID number 2387. Spray records have been requested. WSDA will notify DOE as the actuals are reported.

For further detail of reported information, please refer to the DOE on-line database.
