Subject: Comment on proposed Industrial Stormwater General Permit

---

The proposed Industrial Stormwater General Permit has an Appendix 6 that lists all of the businesses under the existing permit that have tiggered corrective action level 2 and/or level 3..

The proposed permit specifies that all of these businesses will have to comply with Condition S8.B regardless of their current level of compliance.

If the system is working as it should, many of these businesses should have corrected the conditions that triggered corrective action Level 2 or Level 3 responses. The sampling records for those businesses should indicate the improvements. Those businesses should be recognized to their efforts.

Businesses that have triggered a corrective action level 2 response under the existing permit AND have demostrated a history of a least 4 consecutive quarters of compliance with paramter levels at or below benchmark should be removed from the Appendix 6 list prior to the implementation of the proposed Stormwater General Permit.

Sincerely,

Jim Stitt
