WATER QUALITY PROGRAM

3/5/10

To Jon Jennings
Mosquito Control Permit Comments

Please do not limit our Benton County Mosquito Control District in their work to control and kill mosquitoes. They have been effective in our area to eliminate the hordes of mosquitoes we would otherwise have. In the process West Nile virus etc. has been held in check.

Controlling water pollution is also important but controlling mosquitoes and the deadly diseases they spread is of more immediate danger. I have an adult son with lung disease (C.O.P.D.) which makes him vulnerable to such diseases.

Please let the Mosquito Control District continue to do their effective job.

thank you,

Robert Fletcher
