Comments:

Please we need to control both nuisance and vector mosquitos. Our Columbia Mosquito Control District does a wonderful job for the homeowner's in Burbank, WA.

Please eliminate the use of the term "waters of the state" — these "waters" belong to the people and the people have the right to not live in fear of catching diseases that could be prevented.

Preventative treatment is a choice in all aspects of healthy living. Please change your current language to allow our organized mosquito control districts under chapter 17.28 RCW to adulticide to control both vector and nuisance mosquitos as listed in the district's Integrated Pest Management Plan.

Please also eliminate Malathion and Naled restrictions from the permit.

I support as does my husband, our mosquito control districts. We live by both the Snake and Columbia Rivers and the game reservoirs that "grow" the mosquitos. Thank you for reading my comments and giving them consideration.
