Comments:

I feel ALL mosquitos need to be controlled.

I personally get big welts from each bite and I have to be constantly on a medication such as B

It limits the amount of time I can be outside, which I enjoy very much

The use of fogging for mosquitos has been done in previous years at a time when people were not outside.

To wait to try to kill disease carrying mosquitos would cost more in the long run than a program to try to elimate them before they are air borne.

Our mosquito control district has done a good job in previous years and I fully support them.

Let the go. **(Additional public comment)** get the rascals!
