WATER QUALITY PROGRAM

3-15-10

Dear Ms. Jennings,

I am writing in regards to the Mosquito Control. We live in Grandview and have personally seen & felt the benefit of the spraying. In our area there are swimming pools, green scrubs, gardens & lawns all using water. Before the patrol we could not use our deck or be outside after dusk. We have enjoyed the service you provide & do not mind the fee to keep it going.

In the past we have owned horses & still ride. Even tho the horses have had shots for West Nile V. We feel it is important to keep the mosquito ~~population~~ population at a minimum, & please do not stop spraying.

Thank you.
