Dear Sir:

In regards to the letters in the Moses Lake paper about the adult mesquitoes they are not wanting to spray. I'm with Lew McCullough.

I've lived here since 1950 & seen how very bad all those mesquitoes do get, if their not sprayed. We have alot of swampy area's here in town & they really get going there.

Also near the lake & blocks away from the lake you can hardly stand to go out side if their not sprayed am afraid

C#513

Most family's won't be
going out side & people
that come to visit will
not want to come back
with all those pesky
Mosquitoes stinging over one.
My self & Others
really believe we need
to spray especially if
they have no harmful
effects on the people.
Thank you very much
for listening to all of
us that have been
here when it was so
unbearable to go out
side with all the Mosquitoes
we'll have if not for
the spraying

Thanks again
Phyllis McVey
