Jonathon,

We need to keep spraying these nuisance and diseased mosquitoes. Last year living over near the Amon Creek area of Meadow Springs, I'd never seen so many mosquitoes as we did last year late in the spring and early summer time frame. As long as people aren't out breathing in the spray when being applied it shouldn't be an issue. And for those of us who enjoy being on or near the water front enjoying barbecues in the parks, it's a must..

Sincerely,
Daryl Boyle
