---

Dear Mr. Jennings,
We recently received a letter from our Benton-Franklin Mosquito Control District saying that due to a draft being put out by the department of ecology, we may not be able to have adult mosquitos around our home sprayed. This is a serious problem every year for us and our neighbors due to the fact that we have freestanding water in our area (irrigation ponds). The mosquito population becomes so bad that we literally cannot go outside because of this. I fear for myself and my children with West Nile Virus at most and general discomfort at least. Please, Mr Jennings, alter the draft so that it reads
"The Permittee is authorized to discharge incidental amounts of adulticides and their residues to waters of the state for nusiance and vector mosquito control."
We would really love to be able to continue to enjoy gardening and other backyard activities and hope that you will help us to do so.
Sincerely,

Rose and Wayne Kusuda
