We are residents of Potholes Golf and RV resort. Many of the residents of this area are elderly and retired. Last year was the worst year we experienced for moquitos. They were thick and agressive even during daytime hours. I feel there is a need to be extra agressive in the control of these mosquitos...The health of all the neighborhoods in this area could be impacted if the level of control is focused on the larve and not the adults. The area we live in is not large but very dense in population for a rural community. Please do what ever you can to keep the mosquito population under control.
