YES TO SPRAYING NUISANCE MOSQUITOS

re: Nuisance Mosquito Control

Adulticides and their residues used for nuisance mosquito control must not be discharged to waters of the state.

My Comment:

The nuisance mosquitos in this area are extreme. I have lived here since 1983 and have been able to enjoy being out in the beautiful weather in Washington for all these years. If we did not have the right to have these nuisance mosquitos sprayed most of us would have to stay inside much of the time. Please do not take away the pleasure enjoyed in Southeast Washington! I, personally, feel the waters in this area are not impacted from the spray enough to prevent the mosquito control to take place.

Thank you,
Earleen Eskildsen
