Subject: National Pollutant Discharge Elimination System (NPDES) Permit
Date: Tuesday, March 02, 2010 10:40:32 AM

Jonathan Jennings,

I understand that the Department of Ecology has published a draft NPDES permit that is open for pubic comment until March 10, 2010. As I understand it, the draft permit addresses the issue of nuisance mosquito control and bands the application of sprays within 300 feet of surface waters. I've visited the Department of Ecology website for the purpose of downloading the draft but have not been able to locate this document. I would greatly appreciate information that would help me obtain a copy of the draft document so that I can understand its impact on the Benton County Mosquito Control District.

Thank you for your assistance.
