MTCA[2] Method A Cleanup Level				2,000	

Notes:

[1] Chemical analyses performed by North Creek Analytical, Inc of Bothell, Washington. Copies of laboratory report are included in Appendix B. Samples were collected March 23, 24 and April 13, 2002.

[2] Model Toxics Control Act cleanup levels for unrestricted and industrial site uses.

mg/kg = milligrams per kilogram.

"ND" = Not detected.

Bold and shading indicates that the detected concentration is greater than the MTCA Method A cleanup level.
