

## The Department of Ecology's Response to: Bruce Beckwith - Department of the Navy (Comment 50)

Ecology mis-assessed the dissolved oxygen data from the ECOS2004 project. To remedy these errors, Ecology converted these data to mg/L and performed a reassessment of the entire dissolved oxygen dataset. These are the results of that reassessment:

- Listing ID 48952 was moved to Category 3
- Listing ID 48951 was moved to Category 3
- Listing ID 38547 was modified to reflect the assessment error, however, other data sources also showed excursions. This assessment was not moved from Category 5 based on this assessment error. However, this listing is under Ecology review due to other comments received.
- Listing ID 38806 was moved to Category 3
- Listing ID 48991 was moved to Category 2. At least one exceedance was still present in the data after the reassessment.

In addition to the listings noted in this comment, a reassessment of the data also resulted in changes to the following previously Category 2 listing:

- Listing ID 48947 was moved to Category 3
- Listing ID 38878 was moved to Category 3
- Listing ID 38866 was moved to Category 3
- Listing ID 48956 was moved to Category 3
- Listing ID 38559 was moved to Category 3
- Listing ID 48988 was moved to Category 3
- Listing ID 48998 was moved to Category 3
