Subject: Formal comments WIRA 18

Dear Anne & the Department of Ecology, County Commissioners,

I have been reading the comments from our association members. I have to say how disappointed in the ecology I am, the way you are trying to take the people in Sequim down a road to despair. When there are easier ways to handle the issue. The state should buy the water, fix a low fee, have public organization do the monitoring, and stop trying to tell us how to use our water. Are you going to install cameras to watch us.
