Vapor Workgroup Meeting July 16

As part of updating the MTCA cleanup regulation, the Washington Department of Ecology is reviewing sections pertaining to health risks posed by vapor phase contaminants.

Ecology formed an advisory group to provide input on vapor-related rulemaking issues. The third meeting of the Vapor Workgroup is Friday, July 16, 2010, from 10:00 am - noon at the Ecology Headquarters Building in Lacey. This meeting will focus on the decision-making process and information required when deciding whether or not further action is needed to address the vapor intrusion pathway.

All meetings are open to the public. Information about the meeting and meeting materials (background documents, agendas, and meeting notes) will be posted on the Ecology website at: [Vapor Workgroup](#)

Additional information about the ongoing MTCA cleanup regulation update is available at: [MTCA/SMS Rule Update](#)
