

Site Lat/Long:	N 47.774976, W 117.543765
Strategy Objective:	Notification – Inform the dam’s operating company of any oil pipeline rupture or large release of oil upstream of dam
Implementation:	CALL: 509-495-8114 - Immediately call Avista’s General Control Center (GCC) and inform them of the situation
Field Notes:	Once notified, the GCC operator will make additional notifications and follow appropriate procedures (see below)
Resources Targeted:	Energy/Power Generation Water Intakes – Long Lake Dam
Watercourse Description:	River; Spokane River; Waters upstream of River Mile (RM) 58.0

Communication Process & Action:

Pipeline owner, responsible party, responder, or Incident Commander must immediately inform Avista’s Generation Control Center (GCC) of the situation by calling **509-495-8114**.

The Avista GCC inside operator will notify the Spokane River Manager and the Post Street operator or GCC outside operator. Unless modified or altered at the specific direction of Unified Command, Avista will:

- Shut down the generating units at Upper Falls & Monroe Street and evacuate both plants.
- Maintain current outflows, unless no spill gates at the Control Works (Upper Falls) are currently open wide.
- If no spill gates are currently open wide, Avista will fully open one lift gate at the dam.
- Product will then pass through North Channel and over the Monroe Street spillway.

Note: Under low flow conditions, this emergency operation of the lift gate may reduce the Upper Falls forebay elevation below the ordinary legal limit.

Note: Avista GCC personnel must verify the emergency before taking action. This entails a return “call back” to the responsible party or Unified Command. In the event of a Yellowstone Pipeline (ConocoPhillips) rupture/spill, Avista will verify the emergency by calling ConocoPhillips Transportation at 877-267-2290. Avista will verify incidents involving the Chevron Pipeline by calling Chevron at 800-762-3404.

Driving Directions

- From Spokane, Depart I-90 West/US-2 South/US-395 West
- At exit 280, take ramp right for Maple Street toward Lincoln Street
- Keep straight onto 5th Avenue
- Turn left onto S Walnut Street
- Keep left on W Northwest Blvd
- Turn right onto N Cochran Street
- Road name changes to N Driscoll Blvd
- Bear right onto N Assembly Street, then immediately turn left onto SR-291/W Francis Avenue, drive 6.1 miles

Closest Address

N Nine Mile Rd
Nine Mile Falls, WA 99026
