

The Department of Ecology's Response to: Dori Sutton – City of Vancouver (Comment 22)

Ecology's Environmental Information (EIM) System has been updated with the information provided by the City of Vancouver.

Listing ID 7859 has been updated. Listing ID 7859 was updated due to the removal of data that did not meet project QA/QC. Sampling equipment malfunctioned resulting in an erroneous Category 5. The basis has been corrected and the waterbody has been placed in Category 2 based on WQ Program Policy 1-11, Methodology for pH assessment.

Listing ID 50954 has been updated. Listing ID 7859 was updated due to the removal of data that did not meet project QA/QC. Sampling equipment malfunctioned resulting in an erroneous Category 2. The basis has been corrected and the waterbody has been placed in Category 3 based on WQ Program Policy 1-11, Methodology for pH assessment. Note that although there were no excursions of the criteria, there is not enough information to include this waterbody segment in Category 1, therefore it is placed in Category 3.
