Conversation: Washington State"s Water Quality Assessment
Subject: 33-Washington State"s Water Quality Assessment

To: Ken Koch

We recently received an e-mail from Cynthia Nelson of DOE saying that we could download the above document and she gave us the online address. When we went to that address all we could get was a single page summary. We were able to go to another page that said that you could help us obtain copies. I am a member of the Dungeness River Management Team that is in WRIA 18. We would appreciate it if you could help us download a copy or obtain a copy in some other manner. Thank you for considering this request.

Virginia Clark, Phd
