

## **APPENDIX 5 - DISCHARGERS SUBJECT TO TMDL REQUIREMENTS**

Ecology has performed a review of Total Maximum Daily Load (TMDL) documents and determined that no facilities currently covered under the Industrial Stormwater General Permit (ISWGP) discharge to a waterbody with a TMDL wasteload allocation for stormwater associated with industrial activity. Therefore, no facilities under the ISWGP are currently subject to additional sampling or effluent limitations related to TMDLs. In accordance with Special Condition S6.D.6, Ecology will assume the Permittee's compliance with the terms and conditions of the ISWGP complies with the approved TMDL.
