September 16, 2010

NOTICE OF WITHDRAWAL

The Department of Ecology withdraws the following CR-101 Preproposal Statement of Inquiry:

- Chapter 173-400 – General Regulation for Air Pollution Sources and Chapter 173-406 WAC – Acid Rain Regulation/Electric Generating Unit Rule.
- WSR 07-07-128
- Filing date: March 21, 2007

The Department of Ecology does not currently plan to file another CR-101 that references requirements for mercury emissions from coal-fired power plants into Chapters 173-406 WAC, WAC173-400-112, and WAC 173-400-113.

However, the Department of Ecology is still developing changes to Chapter 173-400 WAC – General Regulation for Air Pollution Sources for WSR 10-15-077 filed on July 19, 2010. This rule making has three focal points:

- Development of non-attainment area New Source Review (NSR) rules.
- Correcting State Implementation Plan deficiencies.
- General housekeeping issues.

You can find more information regarding the ongoing rule making at
