

Fourth ESSB 6001 Rule Stakeholder Meeting  
SeaTac Airport, October 23, 2007, 9:00 am to 4:00 pm

**Overall Goal of the Committee's Work:**

To provide input to the Department of Ecology (DOE) about issues, concerns and recommendations related to ESSB 6001. The input will inform the writing of rules that DOE will then propose for adoption.

**Overall Outcome:**

A report of stakeholder recommendations and noted concerns about how the rules will deal with:

- ◆ The implementation and enforcement of the Emission Performance Standard (EPS)
- ◆ Criteria for evaluating carbon sequestration plans
- ◆ An output-based methodology for calculating emissions of greenhouse gases (GHGs) for cogeneration facility.

**Today's Meeting Objectives:**

- 1) Learn about and discuss concerns & recommendations regarding what is written in ESSB 6001 about:
  - a) What is the boundary or scope of processes associated with production of electrical and/or thermal energy to include when calculating emissions?
  - b) For purposes of compliance with the EPS, clarify if scope of emission sources will include all GHGs, as defined under ESSB 6001, or only emissions of CO<sub>2</sub>.
  - c) What are "unspecified sources" and how do we address long-term purchases of electricity from unspecified sources?
  - d) How will Ecology enforce the EPS?
- 2) Identify next meeting topic and prep work.
