

**ESSB 6001 Stakeholder Committee
For October 2, 2007 Meeting
Prepared by: Donald Brookhyser**

Definition of “waste gas”

18 CFR 292.205 Definitions includes:

Waste means an energy input that is listed below in this subsection, or any energy input that has little or no current commercial value and exists in the absence of the qualifying facility industry. ... *Waste* includes, but is not limited to, the following materials that the Commission previously has approved as waste:

...

- (7) Gaseous fuels, except:
 - (i) Synthetic gas from coal; and
 - (ii) Natural gas from gas and oil wells unless the natural gas meets the requirements of § 2.400 of this chapter;

...

- (14) Refinery off-gas.
