7h. Use the table below to list the type and rating of each wetland impacted, the extent and duration of the impact, and the type and amount of mitigation proposed. Or if you are submitting a mitigation plan with a similar table, you can state (below) where we can find this information in the plan. [\[help\]](#)

Activity (fill, drain, excavate, flood, etc.)	Wetland Name ¹	Wetland type and rating category ²	Impact area (sq. ft. or Acres)	Duration of impact ³	Proposed mitigation type ⁴	Wetland mitigation area (sq. ft. or acres)
---	---------------------------	---	--------------------------------	---------------------------------	---------------------------------------	--

¹ If no official name for the wetland exists, create a unique name (such as "Wetland 1"). The name should be consistent with other project documents, such as a wetland delineation report.

² Ecology wetland category based on current Western Washington or Eastern Washington Wetland Rating System. Provide the wetland rating forms with the JARPA package.

³ Indicate the days, months or years the wetland will be measurably impacted by the activity. Enter "permanent" if applicable.

Landside access, if elected by the contractor, will allow for work to be performed in-the-dry. Waterside access via a barge will likely require work done at tides of at least +5.0' above MLLW in order to provide adequate water depths for the barge draft and maneuvering room. Silt fences and straw wattles will be used to control the transport of fine sediment into the marine environment and a floating silt fence will be used as necessary to contain fine sediment in the project area.
