

Washington State Mercury-Containing Lights

2015-2026

Product Stewardship Plan

The Washington State Mercury-Containing Lights Product Stewardship Program Plan is developed pursuant to the provisions of the Revised Code of Washington Chapter 70.275 RCW

PREPARED AND SUBMITTED BY:
PCA Product Stewardship Inc.

December 1, 2014

For submission to:

Washington State Department of Ecology - Waste 2 Resources Program

INTRODUCTION

The Washington State Mercury-Containing Lights Product Stewardship Program Plan (referred throughout this document as the “Plan”) is developed pursuant to the provisions of Chapter 70.275 of the Revised Code of Washington (Chapter 70.275 RCW) “Mercury-containing lights-proper disposal”. The Plan must be approved by the Washington State Department of Ecology (Ecology).

This Plan complies with the requirements of the “Rule” prescribed in (Chapter 173-910 Washington Administrative Code (Chapter 173-910 WAC) where there is no conflict with the requirements of Chapter 70.275 RCW.

According to the law, “...Improper disposal methods (for mercury lights) will lead to mercury releases that threaten the environment and harm human health” (RCW 70.275.010). This Plan outlines a Program intended to reduce improper disposal practices in Washington State. The law requires that the Program be operational on January 1, 2015. A draft version of the Plan was submitted to Ecology on June 12, 2014, and has been amended and re-submitted following a public consultation period that ended on July 9, 2014.

This Program operated in accordance with the Plan will be known as LightRecycle Washington (referred to in this document as the “Program”). The intent of the Program is to establish and operate a comprehensive, safe, and convenient collection, transportation, processing, recycling and final disposition system for a state-wide mercury-containing lights recycling Program (RCW 70.275.020).

1.1 Plan Elements

The key elements of the operation of the Program will be:

- **Stewardship Organization:** The Producers listed in Appendix A have designated PCA Product Stewardship Inc. (PCA) as the Stewardship Organization for the Washington State mercury-containing lights product stewardship Program. PCA will implement this Plan on behalf of the participating Producers. The Program will be publicly known as LightRecycle Washington.

- **Funding:** Beginning on January 1, 2015, all mercury containing lights sold at retail in or into Washington State will include an Environmental Handling Charge (EHC) to fund this Program.
- **Covered Products:** Mercury-containing lights accepted by the Program include compact fluorescent lamps (CFL) of all types and sizes, linear tubes, high-intensity discharge (HID) and other lights used for the purpose of functional illumination in homes, businesses and outdoor stationary fixtures. Collectively, these lights will be referred to as “Program Products.” Throughout this Plan the terms “lamp” and “light” will be used interchangeably.
- **Covered Entities:** The Program will accept Program Products from Covered Entities, defined as “...any person who purchased the mercury-containing light at retail and delivers no more than ten mercury-containing lights to a registered collector on any given day or utilizes a registered residential curbside collection program or a mail-back program for collection of mercury-containing lights and discards no more than fifteen mercury-containing lights into those programs on any given day.” (RCW 70.275.020(3)).
- **Collection Sites:** The Program will create a network of collection sites throughout the state that may include retailers, utilities, solid waste shippers, charities, household hazardous waste (HHW) facilities, Moderate Risk Waste (MRW) facilities, collection events, processing facilities, existing residential curbside collection systems and recyclers.
- **Transportation:** Collected lights will be packaged in Program provided Mercury vapor barrier packaging, defined as “...sealable containers that are specifically designed for the storage, handling, and transport of mercury-containing lights in order to prevent the escape of mercury into the environment (should breakage occur) by volatilization or any other means, and that meet the requirements for transporting by the United States postal service or a common carrier.” (RCW 70.275.020(10)). Collected lights will be transported to a contracted processor (recycler) using a number of transportation options including mail-back and ground transport.
- **Recycling:** Collected Program Products will be collected, transported and recycled as Universal Waste. Recovered mercury will be recycled, stored, managed, or disposed by the processor in compliance with applicable local, state, and Federal laws.
- **Outreach and Education:** A public awareness and education Program including a website and point of sale information will be developed. The Program will “...promote the safe handling and recycling of mercury-containing lights to the public, including producing and offering point-of-sale educational materials to retailers of mercury-containing lights and point-of-return educational materials to collection locations.” [RCW 70.275.030(5)].

1.2 Plan Approval Process

Plan approval steps are detailed below:

- PCA submitted the Plan to Ecology on June 12, 2014.
- Ecology posted the Plan on the agency website for public review on June 18, 2014.
- The public had until July 9, 2014 to review and comment on the Plan and submit comments to Ecology.
- Ecology reviewed the Plan and provided comments on behalf of the agency and other stakeholders to PCA. Ecology also sent all public comments on the Plan to PCA.
- PCA has revised the plan in response to feedback and comments raised during the consultation process.
- Ecology will review any additions or changes to the Plan. Ecology will also determine whether the plan complies with the chapter within 90 days after receipt of a complete plan (WAC 173-910-450(2)) and provide conditional approval.
- Ecology provided approval of the EHC on August 8, 2014, which was within 60 days of submittal of the Plan (RCW 70.275.050 (2)).
- PCA submitted a revised version of the Plan, including a list of the Registered Collection Sites, on December 1, 2014.

The latest version of the Plan can be found on Ecology's web site at:

<http://www.ecy.wa.gov/programs/swfa/mercurylights/>.

1.3 Plan Updates Required

The law requires, at a minimum, that this Plan be updated, reviewed and approved by Ecology according to the following schedule (RCW 70.275.040 (4)). Additional updates will be submitted to Ecology for approval as needed. Plan updates will comply with the Program rule (WAC 173-910-440).

DATE*	PLAN
June 12, 2014	Program Plan Due
August 11, 2014	60 day approval period for the EHC
January 1, 2015	Program start date
January 1, 2017	1 st Program plan update: 2 years from start date
January 1, 2021	2 nd Program plan update: 4 year interval
January 1, 2025	3 rd Program plan update: 4 year interval
July 1, 2026	Program "sunset" takes effect unless extended by Law

**Additional plan updates may be submitted for approval as needed.*

OVERALL PLAN REQUIREMENTS

The plan must include:

- (a) Names and contact information for all participating producers, including names of brands or brand labels used by specific producers;
- (b) The number of mercury-containing lights sold annually in or into the state by producers participating in the plan;
- (c) The types of mercury-containing lights that the program will accept; and
- (d) Details on the management and organization of the stewardship organization.

WAC 173-910-420(1)

2.1 Participating Producers

Definition of Producer

“Producers” are defined in the law (RCW 70.275.020(14)) as follows.

A “producer” means a person that:

- (a) Has or had legal ownership of the brand, brand name, or co-brand of a mercury-containing light sold in or into Washington state unless the brand owner is a retailer whose mercury-containing light was supplied by another producer participating in a stewardship program under this chapter;*
- (b) Imports or has imported mercury-containing lights branded by a producer that meets the requirements of (a) of this definition and where that producer has no physical presence in the United States;*
- (c) If (a) and (b) of this definition do not apply, makes or made a mercury-containing light that is offered for sale or sold in or into Washington state; or*
- (d) Sells or sold at wholesale or retail a mercury-containing light and does not have legal ownership of the brand and elects to fulfill the responsibilities of the producer for that product.*

Every producer of mercury-containing lights sold in or into Washington State for retail sale must participate in a product stewardship program for those products. The Program is open to all Producers.

Producer Requirements

No producer, wholesaler, retailer, electric utility, or other person may distribute, sell, or offer for sale mercury-containing lights for residential use to any person in this state unless the producer is participating in a product stewardship program under a plan approved by the department for mercury-containing lights. (RCW 70.275.090).

Producers cannot sell mercury-containing lights into Washington State unless they are participating in an Ecology approved product stewardship plan. Retailers are only considered Producers (and have the obligations of a Producer) if the retailer elects to fulfill the responsibilities of the Producer (RCW 70.275.020(14)).

Producer Recruitment

Producers participating in the LightRecycle Washington Program are identified in Appendix A. These Producers have designated PCA as the stewardship organization to administer the Program. PCA will submit the Plan and operate the Program on their behalf. PCA will conduct active recruitment of non-participating Producers to ensure maximum participation. Any Producers who are not in apparent compliance with the law will be invited to join LightRecycle Washington and pay any outstanding charges that would have been applied since the Program start on January 1, 2015. Ecology will be notified of any new Producers as they join the Program so that Ecology can maintain an updated list of Participating producers on their website. Producers who refuse to participate and are not in compliance with the law will be reported to Ecology.

2.2 Mercury-containing Light Sales

The [2012-2013 Northwest Residential Lighting Market Tracking Study](#) conducted by DNV KEMA Energy & Sustainability (an energy consultancy company) for the Northwest Energy Efficiency Alliance (NEEA) analyzes and reports CFL market trends. Data from this study was used to estimate the number of CFLs sold for the first year of the Program. According to the NEEA study, total Energy Star CFL sales in 2012 were approximately 9.2 million units in Washington State. Based on data from the British Columbia LightRecycle program, 60% of total CFL sales are for residential use. Based on the assumption that residential sales are representative of retail sales (the term used in the Law), it is estimated that 5.52 million CFLs were sold at retail in Washington State in 2012.

Additionally, the National Electrical Manufacturers Association (NEMA) collects national sales data from the members of its lamp manufacturing sector and compiles this data by calendar year. National sales data was adjusted by Washington State population percentage (2.2% of the U.S. population) to provide a working estimate of the lights sold in Washington State. Based on data provided by NEMA, and using a sales break-down of lighting types based on 2011 British Columbia (BC) data (the only full year in which the BC program was limited to residential use lamps), PCA estimates that 2.418 million fluorescent linear tubes (both straight and curved), and 30,000 HIDs

were sold at retail in Washington State in 2013. On the assumption of stable sales since 2013 for all lighting types, and totaling the estimates from NEMA study for tubes and HID's and the NEEA study for CFLs, the 2015 base year sales estimate used in this Plan is 7.97 million units.

The following table shows a breakdown of the 2015 base year sales estimate by light type:

Light Type	Estimated 2015 Sales	Source
Fluorescent Linear Tubes (all sizes)	2,418,000	NEMA 2013 sales estimate, broken down by light type using 2011 BC sales data.
HID's	30,000	
CFLs	5,520,000	NEEA Study, discounted using BC CFL sales data
Total	7,968,000	

At this time, LightRecycle Washington is the only Program submitted to Ecology, so it is assumed that the Producers participating in the Program will supply 100% of the Program Products sold into Washington State.

2.3 Covered Product Types

The Program will collect all mercury-containing lights as defined in RCW 70.275.020(9) as *lamps, bulbs, tubes, or other devices that contain mercury and provide functional illumination in homes, businesses, and outdoor stationary fixtures*. For greater clarity, the Program will collect and manage the following Program Product Categories:

1. Straight Fluorescent Tubes up to 8 feet in length
2. Curve-shaped Fluorescent Tubes including u-shaped, circular and others
3. Compact Fluorescent Lamps (CFL) – All sizes and types, including pin and screw base
4. High Intensity Discharge (HID) – HID lights include High Pressure Sodium, Low Pressure Sodium, Mercury Vapor and Metal Halide

As defined in RCW 70.275.020(3) (a) and (b), Covered Entities are limited to delivering a maximum of 10 lights on any given day to a registered collection site, unless they are participating in mail-back or curbside collection, in which case they may recycle no more than 15lights per day.

Brands of Non-participating Producers

The Program will accept all brands of lights from the categories cited above, including those from non-participating Producers. Where possible, the Program will identify the Producers of any brands not represented by Program participants and actively recruit them to join the Program. Any Producer not participating in an approved program may be in contravention of the Law.

Orphan Products

The Program will accept “orphan products” - defined in the Law to mean a “*mercury-containing light that lacks a producer's brand, or for which the producer is no longer in business and has no successor in interest, or that bears a brand for which the department cannot identify an owner*” (RCW 70.275.020).

2.4 Stewardship Organization

The Program must be operated by a stewardship organization and financed in the manner detailed in the law (RCW 70.275.050). The Stewardship Organization will implement and operate the Program, and manage the Program budget, including revenues, expenses, and Program administration costs, on behalf of the obligated Producers. The Stewardship Organization is also responsible for establishing the Collection Site network and developing Outreach and Education tools. NEMA provided technical guidance to PCA in developing this Plan. PCA has been designated as the stewardship organization to operate the Program on behalf of the Participating Producers. PCA is a not-for-profit product stewardship organization incorporated in Oregon and registered in Washington (UBI number 603 226 459). PCA is affiliated with Product Care Association of Canada, which operates product stewardship programs for mercury containing lamps and for other products in Canada. The primary point of contact for PCA on the preparation of this Program is:

Lauren Kulokas

Senior Program Manager

lauren@lightrecyclewa.org

877 592 2972 ext. 215

FINANCING SYSTEM

The plan must include a description of how the program will be funded by the producers and how compensation is paid to collectors, transporters, and processing facilities for all services provided to a plan and that payments to service providers will be made within an appropriate period of time from date of shipment or other time frame defined in contractual arrangements. Stewardship organizations will:

- (a) Provide confirmation that revenues and expenditures applicable to this program will be allocated in accordance with generally accepted accounting principles (GAAP).
- (b) Commit to providing an annual financial audit of the stewardship organization conducted by an independent certified public accountant

WAC 173-910-420(2)

3.1 Program Funding

The Program will be funded through an Environmental Handling Charge (EHC) added to the purchase price of each mercury-containing light sold at retail in or into Washington State starting on January 1, 2015 (RCW 70.275.050(3)). PCA has consulted with several stakeholders and industry members, including NEMA, in developing the recommended EHC. PCA also reviewed the budget in detail with Ecology and consulted with Ecology on the calculation of the EHC.

The EHC is \$0.25 per unit for all Program Products.

The EHC has been calculated based on a comprehensive 5-year budget projecting revenues from retail mercury-containing light sales and expenses for packaging and shipping materials, recycling, transportation, communication, education and outreach, and administration. PCA will pay the \$5,000 to Ecology on behalf of each participating Producer and this fee is included in the Program Expenses (as required in WAC 173-910-310). The EHC has been set at a rate to cover projected Program expenses over a 5-year period, taking into account a number of factors including the expected increase in the quantity of Program Products recovered, and at the same time a projected decline in revenue due to decreasing sales of CFLs. For the first 5 years of the Program, CFL sales are expected to decline at a rate of 2% per annum due to fewer CFL promotions, and based on CFL sales trends observed in other PCA programs. All other lighting types are assumed to have flat sales. An overview of the budget is provided in Appendix B.

Periodically, PCA will review actual Program revenue and expenses to determine if an adjustment to the EHC rate is needed. Any adjustments to the EHC will be submitted to Ecology for review and approval, as specified in RCW 70.275.050(4). In the fifth year of Program operations, a new comprehensive budget will be developed to set an EHC for the period from 2020 to mid-2026,

when the Program “sunset” takes effect, unless the Program has been extended by the law. It is anticipated the EHC will be higher for this period, as a result of larger collection volumes and lower revenues due to declining CFL sales. During this period, it is estimated CFL sales will decline at a significantly higher rate, estimated to be 9.8% per annum, due to the continuing migration by consumers to lighting technologies that do not use mercury such as Light Emitting Diode (LED) technology.

Revenues and expenditures applicable to this Program will be allocated in accordance with generally accepted accounting principles (GAAP). PCA commits to conducting an annual financial audit by an independent Certified Public Accountant (CPA) and to provide Ecology with audited annual financial statements. Certain confidential business information for Producers and service providers may be withheld or aggregated.

The EHC must be included in the final purchase price to the consumer (RCW 70.275.050 (3)). Each participant in the Program (Producer, or retailer as remitter if applicable) is required to report the number of units by type of Program Products sold during the reporting period using PCA’s web-based reporting portal. PCA will establish and distribute policies and guidelines for sales data reporting and EHC remittance prior to the commencement of the Program. The reporting period will be monthly, and EHC remittances must be received by the Program before the end of the month following the reporting month. Policies will be considered to allow less frequent reporting for participants who are remitting below a specified threshold.

According to the law, Producers are obligated to report and remit EHCs to PCA based on the number of Program Products sold. Producers are required to add the EHC to the cost of Program Products which are supplied to retailers in Washington State and intended for retail sale. In some cases the retailer may be better positioned to determine the quantity of Program Products sold in or into Washington and may prefer to report and remit EHCs directly to the Program, rather than to pay the EHCs to their supplier. The retailer can elect to remit the EHCs directly to the Program on the Producer’s behalf through a binding remitter agreement and must notify PCA in writing of any such arrangements to ensure all EHCs are properly recorded and remitted. In such a case, the Producer would not invoice the retailer at the time of supply, and instead the retailer would add the EHC to the cost of lights sold at retail, and remit the EHCs directly to the Program on behalf of the Producer.

Remitting retailers will be entitled to retain a part of the EHC, as specified by the Program, as a commission to offset any administrative costs associated with the reporting and remittance of the EHC directly to the Program. Retailers will be informed of the amount of the retailer commission before the Program implementation date (RCW 70.275.050 (3)(b)).

The proposed system of collection, transportation and processing of Program Products is described below in this Program Plan. In general, the Program will have contracts with the transporter and processor, and will commit to make prompt payments in accordance with the terms of those agreements. The Program will register collection sites using an online registration system or if necessary by written agreement. The Program will be responsible for the cost of transporting and processing Program Products collected. It is the intent of the Program that compensation will not be paid to collectors.

USE OF WA STATE BUSINESSES

The plan must explain how it seeks to use businesses within the state, including utilities, retailers, charities, household hazardous waste facilities, processing facilities, recycling facilities, and collection and transportation services for implementation of the plan including existing curbside collection services and existing mail-back services for implementation of the plan.

WAC 173-910-420(3)

4.1 Washington State Businesses

PCA will include Washington State businesses when soliciting services for Program design, education, collection, transportation, and processing services to implement this Program. The following Washington State businesses are current or anticipated service providers to the Program.

Company	UBI Number	Location	Function
Peter Thermos LLC	603 278 604	Seattle, WA	Program Coordinator, Education and Outreach Consultant
Full Circle Environmental	601 604 210	Seattle, WA	Environmental Services and Producer Responsibility Consulting
Sprout A Design Office	602 175 193	Seattle, WA	Graphic Services and Design Consultant
Fuse IQ	602 797607	Seattle, WA	Web Development
EcoLights Northwest, LLC	601 638 547	Seattle, WA	Light boxes and supplies, spill kits, and recycling services
Total Reclaim Inc.	601 350 223	Seattle, WA	Transportation Services

PCA will continue to utilize Washington State businesses when implementing and operating the Program when it is economically sustainable and feasible to do so. Existing Collection Sites throughout Washington State, including retailers, household hazardous waste facilities and curbside and mail-back services will be contacted and invited to participate in the Program collection network as described in the Collectors section. The Program will also include Washington State associations such as (but not limited to) the Washington Retail Association and the Washington State Recycling Association as part of communication, Outreach and Education efforts. More detail regarding the outreach to Washington State businesses and stakeholders is provided in the Education, Public Outreach and Marketing section.

PLAN GOALS

The plan will provide goals for the collection of mercury-containing lights for five years of operation, including:

- (a) Total number of mercury-containing lights sold in or into the state;
- (b) An estimate of the amount of mercury-containing lights available for collection from covered entities; and
- (c) Annual program goals for collection of mercury-containing lights from covered entities for the next five years

WAC 173-910-420(4)

5.1 Light Sales

As outlined in Section 2, PCA estimates that 7.97 million mercury-containing lights were sold at retail into Washington State in 2013, and that quantity will be used as the 2015 base year sales estimate for the Program. Sales of Program Products for subsequent years have been estimated on the assumption that sales number will be flat over that time period for all light types, except that CFL sales are projected to decline at a rate of 2% per year, based on CFL sales trends observed in other PCA programs. Sales data for CFLs in BC between 2012 and 2013 indicate a decline in sales of 9.8%. However due to the high number of utility promotions for CFLs in Washington, it is estimated that the annual decline will be a more modest 2% for the first 5 years of the Program. For later Program years a 9.8% annual decrease is estimated, as the migration from mercury containing lights to other lighting technologies such as Light Emitting Diode (LED) technology accelerates.

Based on the assumptions above, the following table shows the expected total number of mercury-containing lights to be sold in or into Washington State over the next 5 years:

	2015	2016	2017	2018	2019
Total Program Products Sold	7,968,000	7,857,600	7,749,408	7,643,380	7,539,472

5.2 Lights Available for Collection

The number of lights actually available for collection as waste lights in a given year is subject to a number of complex and changing factors which determine the usage and lifecycle of a particular

light. In these circumstances, the Program makes the assumption that the number of mercury-containing lights potentially available for collection from covered entities is the same as the number sold in the same year. The number of lamps actually collected will be compared to the number of lamps reported to the Program as sold in the same year, to determine a recovery rate.

To estimate the number of Program Products to be collected, PCA accumulated data from the collection networks currently operating in Washington State:

1. **WA State Household Hazardous Waste (HHW) 2013 Reports** – Ecology collects data from municipal HHW programs throughout the state. This data provides separate reporting of mercury-containing lights received at HHW facilities from Washington residents, reported to Ecology from HHW operators by weight (pounds). The HHW data does include lights received from Conditionally Exempt Small Quantity Generators.
2. **Take it Back Network (TIBN) 2013 Data** - The TIBN collects CFLs and linear tubes through participating retailers in Snohomish and King Counties and to a lesser extent, Pierce County. All collection data from the TIBN is included in the base-year collection estimate as these sources typically received less than 10 units per day per participant. TIBN data is reported in pounds.
3. **Puget Sound Energy (PSE) 2013 Data** – PSE collects residential CFLs from Covered Entities at office and business locations in Western Washington. The quantity of CFLs collected in 2013 was reported in pounds.

The quantity of Program Products currently collected through retail stores or from on-line mail-back collection programs is not included in the baseline collection estimate because those figures are not publicly available.

Collection data that is received in pounds is converted to units using the following conversion factors:

Compact fluorescent lights: 1 light = 0.25 pound

4' Linear fluorescent lights: 1 tube = 0.5 pound

8' Linear fluorescent lights: 1 tube = 1 pound

Residential HID lights: 1 light = 1.5 pounds

Aggregated data from the collection networks listed above results in a total of 403,516 pounds of lights collected in 2013. Applying the percentage breakdown by type of lights collected based on data from PCA's BC LightRecycle program in 2011, results in a collection estimate for 2013 of 904,106 units. It is assumed that in the first year of operations the Program will increase collection volume by 5% by expanding and promoting the current collection network, resulting in a 2015 base year collection of 949,311 units.

The following table shows the calculation of the 2015 base year collection estimate:

Light Type	% Breakdown (BC 2011 Data)	Weight (pounds)	Units per Pound	Units by Type
Total weight collected through existing network		403,516		
CFL's	18%	72,898	0.25	291,592
2-4' Tubes	70%	281,897	0.5	563,793
8' Tubes and HID's	12%	48,722	1	48,722
Total 2013 Units Collected				904,106
Collection Increase				5%
2015 Estimate				949,311

5.3 Annual Collection Goals

Washington State has some existing networks for collecting mercury-containing lights as described above, however much of this infrastructure is concentrated in King, Pierce and Snohomish Counties. This tri-county area accounts for about 50% of state population, 65% of lights collected through HHW sources and 100% of the Take it Back Network volumes. The Program will increase accessibility by providing additional collection sites throughout the state, and reaching rural communities that are not currently serviced by the existing network. The collection network will be free of charge to consumers, eliminating the recycling fees that some collection sites currently charge, which will improve accessibility and increase collections. Another important method of increasing the quantity collected is the promotion of the Program through Outreach and Education initiatives.

As a result, the Program collection goal is to continue to increase collection quantities from the 2015 base year collection estimate, by at least 5% annually. This increase in collection volume will be accomplished by expanding and promoting the collection network as described above and increasing Program awareness.

The following table outlines the collection targets for the Program for the next 5 years:

	2013 Estimate	2015	2016	2017	2018	2019
Total units collected	904,106	949,311	996,777	1,046,616	1,098,946	1,153,894
Annual collection increase		5%	5%	5%	5%	5%

The base year estimate for sales of 7,968,000 units, and the base year collection estimate of 949,311 units, result in an initial recovery rate of 12% for 2015. PCA's BC LightRecycle program, which includes both residential and commercial use mercury-containing lights, had a recovery rate

of 11% after 4 years of operation. The 2015 collection target of 949,311 units and recovery rate of 12%, is considered a realistic target for the first year of Program operations based on this direct operational experience.

The Program will strive to exceed the targets listed above, and will continue to promote and encourage the collection of lights even after targets are met. The 5% annual increase is the baseline target that was used for budgeting purposes. If the quantity of lights collected exceeds these target amounts, the budget and EHC rate will be revised accordingly to ensure the Program has sufficient funding to support the volume that is collected.

PCA has a goal of registering as many collectors in the existing network as possible for the Program since the public is already recycling bulbs at these facilities and locations. These collectors may include HHW collection sites, retail locations and other entities. Rural counties where there are currently few collection sites are expected to achieve more significant percentage increases in collection volume compared to counties with existing collection facilities, such as King, Pierce and Snohomish counties. As PCA gains experience with the collection network and the number of lights collected annually in each county, targets can be increased.

By June 1, 2016, PCA will submit the 2015 annual report to Ecology that will state unit sales and units collected during that calendar year. This actual collection data will replace the 2015 baseline collection estimate and the Program goals will be increased if actual collection is significantly higher than the estimate. The Program will track and report on the quantity of Program Products sold and collected on an annual basis and this data will be used to assess Program performance and revise goals on an on-going basis. Any changes to Program goals will be included in subsequent revisions to this Plan and annual reports submitted to Ecology.

COLLECTORS

The plan must include the following information about collectors participating in the plan:

- (a) The type of collection services in the plan, including curbside collection activities, household hazardous waste facilities, drop-off locations, collection events, and accumulation points for curbside or mail-back collection;
- (b) Registration information for collectors participating in the plan as required in WAC 173-910-520(1), including accumulation points used for curbside or mail-back collection;
- (c) A written statement from each collector ensuring that the collector will comply with the requirements in WAC 173-910-520;
- (d) A statement that collection sites will be:
 - (i) Staffed during operating hours; and
 - (ii) Open during regularly scheduled hours and on an ongoing basis.

- (e) A description of the consideration given to existing residential curbside collection infrastructure and mail-back systems as appropriate collection mechanisms;
 - (f) A statement identifying how quickly collection containers will be provided once containers reach capacity;
 - (g) A description of the communication and outreach process to answer questions, provide supplies, or provide technical assistance to collectors;
 - (h) A description of the technical assistance to be provided to collection sites, including written instructions on how to participate in the program and how to appropriately handle and store mercury-containing lights;
 - (i) A description of the packaging and shipping materials that will be used when collecting, accumulating, storing, and transporting mercury-containing lights to minimize the release of mercury into the environment and to minimize breakage; and
 - (j) Drafts of spill and release response plan and worker safety plan required in WAC 173-910-520.
- WAC 173-910-420(5)

6.1 The Program Collection System

The law requires: *(4) Product stewardship programs shall provide, at a minimum, no cost services in all cities in the state with populations greater than ten thousand and all counties of the state on an ongoing, year-round basis. (RCW 70.275.030)*

The Program intends to utilize the existing collection network currently established in Washington State. Although PCA cannot require any existing collector to join LightRecycle Washington, all existing collection sites will be invited to participate. The Program will expand the collection system with additional collection sites, particularly in rural areas. There will be no charge imposed on Covered Entities to drop off lights at any Program collection location. PCA may hold collection events in rural areas not adequately served by permanent collection sites.

The collection network will continue to be developed through 2014 as well as after Program implementation on January 1, 2015, taking into consideration factors such as availability and capacity of facilities, proximity to population, ease of access and cost effectiveness.

Potential collection sites include retailers, recycling organizations and businesses (both non-profit and for profit), local government Household Hazardous Waste (HHW) or Moderate Risk Waste (MRW) collectors, local government recycling centers, curbside programs, transfer stations and other associations or businesses interested in participating in the Program, including any other locations which currently collect mercury-containing lights. All mercury-containing lights that are collected through Program collection sites will be picked up or mailed to the processor where they

will be recycled. In some areas of Washington, solid waste management companies offer curbside collection of mercury-containing lights, meaning that residents are able to place lamps on or near garbage and recycling containers for pick-up at curbside. Curbside or mail-back collection programs can join the Program as part of the collection network.

Mail-back programs are sometimes used to create a collection service for certain types of lights. Collection containers that are designed to store and ship lights are sent to designated collection sites and when the containers are full, they are shipped to the processor, usually via common carrier.

The Program will accept lamps collected through a curbside or mail-back collection program in Washington State, (up to the limits set forth in the law) and LightRecycle Washington will provide supplies, transportation and processing at no charge provided that the waste management company, utility or other entity registers with the Program as an authorized collector.

Registered Collection Sites

It has been determined that 94 Collection Sites located in the cities and counties listed in Appendix C are necessary to fulfill the requirements of the law. Appendix C lists cities with populations over 10,000 and the remaining counties that have no cities with populations over 10,000. If a county has a city with a population greater than 10,000, the county site requirement will be fulfilled by the establishment of a collection site in that city.

As of December 1, 2014, the list of registered Collection Sites includes 130 sites that will accept all program products and 61 sites that will accept CFLs only for a total of 191 Collection Sites. One curbside collection program has also registered. The types of Collection Sites that have registered is provided below, and a list of all registered Collection Sites is provided in Appendix C.

- Collection Sites: All Program Products
 - 40 – MRW, HHW, transfer station and other municipal facilities
 - 90 – Retail locations
- Collection Sites: CFLs Only
 - 61 Retail Locations
- Curbside Collection Programs:
 - 1 - Curbside Waste Management Company (Recology/CleanScapes)

Over 20 other retail locations and 5 municipal locations are currently considering becoming Collection Sites in the Program. Additionally, retail chains with over 80 locations are considering becoming Collection Sites for CFLs only.

Two additional waste management companies with curbside fluorescent lamp collection programs have been contacted to discuss participating in the Program, and one is reviewing information about the Program.

The current network of 191 Collection Sites will provide a convenient drop-off option to the majority of Washington State residents and should allow the Program to meet and exceed collection goals. However, LightRecycle Washington will continue to add Collection Sites to increase convenience and ensure our ability to meet and exceed the collection goals described in the Plan.

Cities of 10,000 or more people and counties that do not have a registered Collection Site will be serviced by collection events if no Collection Site is registered before the collection event is scheduled.

In addition to collecting mercury-containing lights, collection site operators will:

- Request transportation for filled containers of lights.
- Re-order supplies needed to store, transport and manage lights.
- Receive LightRecycle Washington operation information and marketing materials.
- Provide feedback to the Program.

Collection sites can communicate with the Program in three ways:

1. Log in to the Website at www.lightrecyclewa.org
2. Call the toll-free telephone number for the Program
3. Contact the Program by fax

Collection sites will be classified by the Program as “large” or “small” based on the quantities that are collected and their location and will be serviced as follows:

Large collection sites:

- Request transportation of Program materials either online or by telephone. (Pick-ups are usually made within one to two weeks depending on the collection site location and when the request is made).
- Receive supplies when collected lights are picked up if supplies are needed (in most cases).
- May use larger lamp storage containers, such as fiber drums or pallet boxes.

Small collection sites:

- Will be serviced by common carrier (such as FedEx) who will pick up sealed boxes of collected Program Products
- Receive supplies via common carrier, generally within one to two weeks from the time of request.

Collection Site Supplies and Information

Collection sites will be provided with the supplies and information they need to safely collect, store, manage and prepare for the shipment of mercury-containing lights.

Mercury vapor barrier packaging is required for containers that are used to store and transport mercury-containing lights. These containers will include a mercury vapor barrier as described in RCW 70.275.020(10) that meets the requirements for transport by the United States Postal Service or a common carrier, such as FedEx. The containers themselves are primarily cardboard boxes that have been designed to hold various types and sizes of lights in quantities that can be handled safely and shipped economically.

Every LightRecycle Washington collection site will be provided a printed copy of the Collection Site Guidelines. This document provides detailed instructions on how to operate a collection site including:

- (a) Appropriate handling and storage of mercury-containing lights;
- (b) Logistics management for the pick-up of filled collection containers and the drop-off of replacement containers;
- (c) A communication and outreach process to answer questions, provide supplies, or provide technical assistance to collectors;
- (d) Technical assistance to collection sites;
- (e) Packing and shipping materials;
- (f) Spill and release response plan;
- (f) Worker safety plan; and,
- (g) Marketing materials (posters, brochures...) available to collection sites.

The Program may change the Collection Site Guideline, supplies and marketing materials over the course of the Program. When the Collection Site Guideline is revised, Collection Sites will be notified and provided with an updated copy. The Collection Site Guideline can also be downloaded at this Web address:

www.lightrecyclewa.org/collection_site_guideline

Marketing materials will be shipped to collection sites prior to the launch of the Program on January 1, 2015, and on an ongoing basis. The initial set of materials includes:

- “Recycle Here” posters featuring images of mercury-containing lights and basic Program information.
- “Recycle Here” banners for facilities requiring outdoor signage.
- Rack cards are 4 x 6 inch cards with Program details and a quick response code which can be scanned by a smart phone, taking the user to the Collection Site locator Web application.

The following graphic shows an example rack card:

Additional outreach materials will be developed and produced before and after the Program launch in January 2015.

Broken Mercury-containing Lights

Using safe handling and management practices for lights helps to avoid breakage. However, the fragile nature of lights indicates that collection sites must be prepared to manage broken lights. Broken lights can come from two sources:

1. Collected lights that are broken after being dropped off at the collection site.
2. Residents dropping off broken lights in a sealed bag or container.

A broken light clean-up kit will be provided to all collection sites for lights that are broken after being dropped off. Clean-up supplies can be re-ordered with other Program supplies.

Broken lights that have been placed in a sealed container may be included with lights that have been collected for the Program. They are then transported and recycled with other Program materials.

The Washington State Department of Ecology broken light clean-up procedure is available on the Program website and in the Collection Site Guidelines. The key elements of this procedure are as follows:

How to Clean up a Broken Fluorescent Bulb

Be careful not to break fluorescent bulbs. However, if you do break a fluorescent or other mercury-containing bulb, do not panic, and follow the following instructions:

Avoid breathing vapors or touching broken materials.

Do not vacuum or sweep.

1. Open windows to vent vapors for at least 15 minutes. Leave the area during this time.
2. Use stiff paper or cardboard to pick up large pieces.
3. Use duct tape to pick up small pieces and powder.
4. Wipe the area clean with a damp paper towel or wet wipe.
5. Place all materials in a sealed container, preferably made of glass and with a good lid.
6. Immediately remove the container from the home.
7. Wash your hands.
8. Dispose of at your local hazardous-waste facility—not in your trash. (Contact [1-800-RECYCLE](tel:1-800-RECYCLE) or www.lightrecyclewa.org for locations.)

It may be a good idea to cover porous flooring with a sheet of plastic when changing bulbs. Some people choose to wear nitrile or neoprene gloves and/or a chemically protective mask, but there is no evidence that this is necessary.

http://www.ecy.wa.gov/mercury/mercury_bulb_cleanup.html

6.2 Registration Information

Before the January 1, 2015 start-up date, Program information for interested collection sites will be available on the LightRecycle Washington website at www.lightrecyclewa.org. The Program will register interested organizations that can provide collection services through the Program website through an online registration process. PCA will not directly own or manage collection sites.

Collection sites will be registered using a streamlined process, making it easy to sign up while meeting all the requirements set forth in the law and rules. Two registration methods will be offered:

1. An online form can be completed to provide all required information.
2. A written proposal is available with the same requirements as the online form.

As part of the registration process, collectors will be required to verify they comply with the requirements in WAC 173-910-520; including confirmation that collection sites will be open and

staffed during regularly scheduled hours and on an ongoing basis. Collection sites will not be allowed to crush or process collected lights. More detailed information on operating procedures for Collection Sites can be found in the Collection Site Guideline referenced above.

Registration information for all participating Collection Sites are included in Appendix E.

6.3 Universal Waste

The Program will collect, transport and manage mercury-containing lights as Universal Waste Lamps. Collection sites will be Small Quantity Handlers of Universal Waste (SQHUW) (WAC 173-303-573) and the frequency of pick-up will ensure all sites maintain this regulatory status. As SQHUW, Collection Sites can store up to 2200 pounds of mercury-containing lights at any one time, however collected lights can be picked up upon request or mailed to the processor as frequently as needed. There are no registration requirements for SQHUW's; however, WAC 173-303-573 provides standards and procedures for managing mercury-containing lights. The Program will comply with Universal Waste Regulations but may have additional requirements to comply with Rules established in WAC 173-303-190 (Preparing Dangerous Waste for Transport).

As mentioned above, the Collection Site Guideline will be provided to Collection Sites and can be downloaded from the LightRecycle Washington website.

TRANSPORTERS

The plan must include information about transporters participating in the plan, including:

- (a) Registration information for transporters participating in the plan, including names, addresses, and contact information.
- (b) A written statement from each transporter ensuring that the transporter will comply with the requirements in WAC 173-910-530.

WAC 173-910-420(6)

7.1 Program Transporter

The initial Program transporter for direct pick-up from Collection Sites will be Total Reclaim Inc. Total Reclaim complies with the requirements of WAC 173-910-530 and is a registered hauler of recyclables as required by Chapter 173-345 WAC.

Registration information for Total Reclaim is provided below.

Total Reclaim Inc.

Common Carrier UTC Permit # MC-661411-C

US DOT Haz Mat # 820837

Contact: Patricia Rosenfeld

Address: 2200 6th Ave South Seattle, WA 98134

Phone: 206-343-7443

PCA will contract with Total Reclaim as the Transporter for the Program. Total Reclaim may sub-contract with third party transporters at their discretion, but must ensure that any additional transporters used meet the requirements of WAC 173-910-530. A detailed contingency plan will be included in the contract outlining procedures to follow in the event Total Reclaim cannot operate or provide services to the Program. The Program may add or change Transporters during the course of the approved Program, subject to approval by Ecology.

Collected Lights that are mailed to the processor will be delivered by a common carrier (such as FedEx) that meets the requirements for registered shippers of recyclables. As described in Section 1.1, Collected lights will be packaged in Program provided Mercury vapor barrier packaging, defined as “...sealable containers that are specifically designed for the storage, handling, and

transport of mercury-containing lights in order to prevent the escape of mercury into the environment (should breakage occur) by volatilization or any other means, and that meet the requirements for transporting by the United States postal service or a common carrier.” (RCW 70.275.020(10)). Shipping costs will be covered by the Program.

Provided below is copy of the written statement that Total Reclaim has provided to PCA acknowledging the need to comply with the requirements in WAC 173-910-530.

July 23, 2014

Ms. Lauren Kulokas
Program Coordinator
Product Care Association
105 West 3rd Avenue
Vancouver BC, V5Y 1E6

RE: WAC 173-910-530 Transporter Requirements – Mercury-Containing Lights Product Stewardship Program

Ms. Kulokas:

Total Reclaim, Inc. does comply with the requirements contained in WAC 173-910-530, as well as other requirements of the chapter.

Thank you for the opportunity to participate in this important new recycling program.

Sincerely,

A handwritten signature in black ink, appearing to read 'CL', is written over a light blue dotted grid background.

Craig Lorch

Total Reclaim, Inc.

PROCESSING FACILITIES

The Plan must include information about processing facilities participating in the plan, including:

(a) Registration information for processors participating in the plan, including names, addresses, contact information and hours of operation;

(b) A description of the methods used to process mercury-containing lights at each processing facility in the program; and

(c) Compliance audit reports for each processing facility participating in the plan completed by a qualified third party. The compliance audit will research, review, and report on the following:

(i) Compliance with all federal, state, and local requirements and, if it exports, those of all transit and recipient countries that are applicable to the operations and transactions in which it engages related to the processing of mercury-containing lights, components, parts, and materials and disposal of residuals. These include, but are not limited to, applicable legal requirements relating to:

(A) Waste and recyclables processing, storage, handling, and shipping;

(B) Air emissions and waste water discharge, including storm water discharges;

(C) Worker health and safety; and

(D) Trans-boundary movement of mercury-containing lights, components, materials, waste, or scrap for reuse, recycling, or disposal.

(ii) Information on financial penalties, regulatory orders, or violations the processing facility received in the previous three years; and

(iii) Any other information requested by the department.

WAC 173-910-420(7)

8.1 Program Processor

The initial Processor for the Program will be EcoLights Northwest. EcoLights was selected through a competitive RFP process which was conducted previously by PCA during the development of the State program (which will not be implemented). Based on the recentness of that selection process, the Program will contract with EcoLights as the initial recycling processor for the Program.

Registration information for EcoLights is provided below.

EcoLights Northwest LLC

Contact: Alex Ralph

1915 S. Corgiat Drive

Seattle, WA 98108

Phone: 206-343-1247

Hours: Monday – Friday 7:30 – 4:30

Collected Program Products will be recycled to the maximum extent possible at all times. Mercury-containing lights are crushed by the processor in a specialized machine for processing lamps that operates under negative pressure. The crushed lamps are separated into component parts; glass, aluminum endcaps, and mercury phosphor powder, for shipment to downstream recycling vendors. The glass is used as aggregate in the manufacture of concrete, aluminum end-caps are sold to scrap aluminum buyers, and the mercury phosphor powder is shipped to an EPA regulated and approved mercury retort for purification. Following retort, the mercury is available for use in new lighting products and the remaining phosphor powder is shipped for recovery of rare earth elements contained in the powder. Nearly 100% of non-hazardous Program material, including glass and aluminum, are recycled.

PCA will contract with EcoLights Northwest as the Program recycler. A detailed contingency plan will be included in the contract outlining procedures to follow in the event EcoLights Northwest cannot operate or provide services to the Program. The Program may add or change Processors during the course of the approved Program, subject to approval by Ecology.

Ecolights Northwest has provided PCA and Ecology with a Compliance Audit Report completed by a qualified third party that satisfies all the requirements of WAC 173-910-420(7)(c).

RECORD KEEPING

The plan must include procedures for how the stewardship organization will collect and maintain records to meet and demonstrate compliance with the recordkeeping requirements of this chapter. At a minimum, the stewardship organization will track the following information:

- (a) Total number of mercury-containing lights sold in or into Washington State for all producers participating in the plan.
- (b) The types of mercury-containing lights collected by the program.
- (c) List of all collection sites and collection services, including curbside and mail back.
- (d) Identification of transporters and processing facilities participating in the plan.
- (e) Mercury-containing lights collected, transported, and processed for the plan, including:

(i) Total mercury-containing lights, by weight in pounds, collected from individual collection sites collection services, curbside and mail back.

(ii) Final destination and quantities of lights processed and disposed.

(f) Education efforts for consumers, retailers, utilities, collectors, transporters, and processors, including assessments of the effectiveness of these efforts.

(g) Efforts to promote the mercury-containing lights collection program.

WAC 173-910-420 (8)

9.1 Record Keeping Overview

PCA will collect and maintain records relating to Program activity in order to demonstrate compliance and substantiate Program performance improvement. The information submitted to Ecology in the required Annual Report will include:

- (a) Annual Mercury-containing Light Sales in Washington State by participating Producers - See Section 5(a) of this Plan.
- (b) List of registered collection sites and locations, compared to the required locations by County and City. (see Appendix C)
- (c) Identification of transport, processing, and recycling services (see Sections 7 and 8).
- (d) Quantity and types of Program Products collected, transported, and processed. The total number of mercury-containing lights, estimated by weight in pounds using standard conversion factors (see Section 5(b)), collected from individual collection sites, collection services, curbside and mail back. It will also track the final destination of all lights recycled.
- (e) The Program will document education efforts for consumers, retailers, utilities, collectors, transporters and processors including assessments of the effectiveness of these efforts. Examples of education and outreach materials to promote the Program are included in Section 11.
- (f) The Program will document the efforts to promote the mercury-containing lights collection Program.
- (g) The annual report will identify the primary processor(s) for all lights processed through the Program as well as quantities and management method (reuse, recycling, disposal) for lighting components (aluminum, phosphor, mercury, glass).

Quantities of Program Products will be reported by Producers and Retailers to the Program monthly through an online portal and stored in a secure database. Collection information will also be reported by the processor to the Program on a monthly basis subject to verification by PCA. Other Program records such as registered Collection Sites and education and outreach efforts will be maintained by PCA. Informal reports summarizing collected Program information will be provided to Ecology on a quarterly basis.

IMPLEMENTATION TIMELINE

The plan must include a timeline showing when each of the following will occur and a detailed description of each activity including, but not limited to:

- (a) Start-up of the collection and processing efforts;
- (b) Education efforts for consumers, retailers, collectors, transporters, and processors;
- (c) Outreach efforts for the mercury-containing lights collection program; and
- (d) Continual progress toward collection of spent mercury-containing lights.

WAC 173-910-420 (8)

10.1 Timeline Overview

The following chart shows the anticipated timeline for the Program Plan, collection system, transportation and processing activities and education and outreach. Individual implementation tasks will be addressed in time periods marked with a bullet.

LightRecycle WA Program Implementation	May	June	July	Aug	Sept	Oct	Nov	Dec	2015
Product stewardship plan									
Consultation on Program Plan / respond to comments	•								
Submit Final Plan for approval		•							
Public Comment and resubmit to Ecology				•					
Conditional Approval					•				
Submit Final Plan Components					•	•	•		
Final Plan Approval								•	
Collection System									
Recruit collection sites	•	•	•	•	•	•	•	•	•
Prepare collection sites (equipment, signs, training)						•	•	•	•
Develop collection site manual			•	•					
Audit collection sites (as needed)									•

LightRecycle WA Program Implementation	May	June	July	Aug	Sept	Oct	Nov	Dec	2015
Collection system operational									•
Transportation and Processing									
Budgeting for transportation and processing costs	•								
Provide training to processors (tracking, standards, data)		•	•				•	•	•
Transportation and processing system operational								•	•
Education and outreach									
Develop communications strategy	•					•	•	•	
Program website development	•	•	•	•	•	•	•	•	
Identify local government, utilities and other partnership opportunities						•	•	•	
Work with stakeholders on communication strategies						•	•	•	•
Design and printing of Program brochure	•					•	•		
Distribution of brochures to retailers, collection sites etc.			•		•			•	
Retailer Webinar to explain EHC obligations					•				
Establish and manage social media platforms							•	•	•
Launch preliminary Website with Program information	•								
Launch collection site finder on web page									•

EDUCATION, PUBLIC OUTREACH AND MARKETING

A description of how the plan will meet the public education, outreach and marketing requirements, including:

- (a) How it will provide information about where and how to deliver their mercury-containing lights to a product stewardship program collector at the end of the product's life;
- (b) Providing a web site and toll-free number that gives information about the product stewardship program in sufficient detail regarding how and where to drop off mercury-containing lights into the product stewardship program, and collaborating with the department to provide information necessary to keep the 1-800-RECYCLE online data base up to date;
- (c) Describing the outreach method or methods used;
- (d) How it will ensure outreach to the public throughout the state;
- (e) How it will provide outreach materials for educating the public to all collectors used by the plan;
- (f) Explaining how the plan will coordinate education, public outreach, and marketing with other approved product stewardship plans;
- (g) Explaining how the plan will coordinate on education, public outreach, and marketing with retailers, distributors, wholesalers, and electric utilities; and
- (h) Explain the public review process implemented by the stewardship organization, the public comments received by the stewardship organization, and how the stewardship organization addressed those comments.

WAC 173-910-420(10)

11.1 Overview

PCA will develop a communication and outreach strategy designed to:

- Increase the number of mercury-containing lights recycled in Washington
- Publicize
 - The network of convenient, no-charge drop-off sites throughout the state
 - The legal obligation to properly recycle mercury-containing lights
 - The environmental benefits of recycling mercury-containing lights
- Comply with applicable Washington regulations

Phased Approach

The communication strategy will be developed in phases, starting with this overview and roadmap, and continuing through the Program launch on January 1, 2015. Although some elements of the communications strategy are known, many planning and information gathering activities will not occur until 2015, such as:

- **Hiring Marketing Vendors:** One or more firms will be engaged in the fourth quarter of 2014 and will contribute to the development of strategy, messaging, advertising, public relations, social media and other outreach activities.
- **Conducting Research Studies:** Two studies will be conducted, starting as soon as possible after the launch of the Program in January 2015. These studies will gather data on consumer awareness and behavior with regard to the use of, and attitudes towards, mercury-containing lights and recycling. These studies are likely to have an impact on the messaging and advertising mix of the Program.

Additionally, certain advertising buys will coincide with the launch of advertising campaigns that will begin near the end of the first quarter of 2015 or beginning of the second quarter of 2015. The make-up of advertising inventory for Web, print, outdoor and others may be different in 2015 than it is currently. In order to buy efficiently, the Program will research and purchase advertising over time, researching current opportunities, and seeking the best value to the extent possible, such as when media companies are competing for clients.

Lastly, the minimum 10-year time frame of the Program requires that the education and outreach efforts will be continually evaluated and adjusted to identify the messages, advertisements and campaigns that resonate more or less than others, and to emphasize the most effective elements of the overall communications effort.

Pre-launch Communication Activities

Prior to January 1, 2015, PCA will develop a basic set of marketing materials with a focus on Collection Sites and retailers. These pieces, all of which include Program branding, include the most basic elements of the education and outreach effort, such as:

- **Collection Site Signage**
 - “Recycle Here!” posters (indoor)
 - “Recycle Here!” banners (outdoor)
- **Information Postcards – 4” x 6” cards with basic information about the Program and a QR code that can be scanned with a smartphone to open a “Collection Site locator” Web application and designed to be taken home by consumers.**
 - Retail Shelf Talkers – placed near mercury-containing lights being sold at retail
 - Rack Cards – the initial marketing piece for the Program, produced for placement near retail cash registers and at LightRecycle Washington Collection Sites
- **Website: www.lightrecyclewa.org**
 - Pre-launch, this Website is a small information brochure with basic Program details and contact forms for consumers and potential collectors.

- The complete Website will be developed prior to 2015 in order to be ready on January 1, 2015. The Website will include a Collection Site locator (map) application and more detailed information about the Program. (See section 11.2 below.)
- Selection of marketing vendor(s) – LightRecycle Washington will research and request proposals from marketing and public relations firms in Washington State.
- Social Media: Most of the social media strategy will be planned and executed after the Program launch in 2015. However, a basic social media presence will be put in place in the fourth quarter of 2014.
- Press Release: When the Program begins on January 1, 2015, PCA will send out a Program launch press release and look into other ways to maximize initial media coverage.

Post-launch Communication Activities

With the new Program underway, much of the first quarter of 2015 will be spent planning the marketing communications and verifying that the collection system is functioning properly before seeking increased collection through advertising.

Although advertising may begin near the end of the first quarter of 2015, most of the Program advertising will occur in the second and third quarters of 2015. All campaigns will taper or end completely as the holiday season approaches in October. During November and December, LightRecycle will plan marketing activities for 2016. The following timeline shows an overview of the Communications Roadmap for 2015.

2015 Communications Roadmap											
Q1			Q2			Q3			Q4		
Program launch press release											
Awareness study											
Consumer behaviour study											
Strategy development (earned media and advertising)											
Fine-tune messaging											
Research advertising, PR and promotion opportunities											
Plan advertising mix and specific campaigns											
Research non-traditional programs (e.g. college ambassador programs)											
Launch ad campaigns and other programs											
Research and buy Spanish-language advertising											
Launch promotional partnerships											
Expand social media activities											
Evaluate and adjust current campaigns											
Plan 2016 activities											

PCA will ensure outreach to the public throughout the state by:

- Providing signage and outreach materials at collection sites in every county and city of 10,000 residents or more.
- Providing marketing materials to over 2,000 retail locations that sell mercury-containing lamps.
- Conducting advertising campaigns that reach every part of the state.
- Maintaining a Website and social media presence that can be accessed in any part of the state.
- Conducting Spanish-language advertising campaigns.
- Placing press releases and actively seeking earned media opportunities.

11.2 Key Messages

PCA will provide information about recycling mercury-containing lights throughout Washington. Marketing materials will specifically address:

- The categories of lights that are accepted in the Program at no charge.
- How to find a Collection Site for mercury-containing lights.
- Drop-off limits for Washington residents.
- The law that prohibits disposing of mercury-containing lights in the solid waste stream.
- The hazards mercury can pose to human health and the environment.
- Proper handling and recycling methods for mercury-containing lights.
- The economic and environmental benefits of using and recycling mercury-containing lights.

As mentioned above, the messaging will be adjusted based on the awareness and consumer behavior studies that will be conducted in the first quarter of 2015 and by recommendations made by contracted marketing vendors.

11.3 LightRecycle Washington Website

The website www.lightrecyclewa.org will highlight key Program information such as the types and quantities of lights that can be recycled. The Collection Site locator web application is a key component of the website and a link to it will be prominently displayed on the home page. The locator app will allow users to enter a zip code or other information and then display LightRecycle Washington collection sites in the area both in text and on a map.

Other website content will include contact forms and information on:

- Program overview with links to the law and related information
- Product Stewardship and Light Recycling
- Broken Lights
- Consumer FAQ
- Becoming a Collection Site
- Downloadable brochure and graphics

Retailers and Collection Sites will be able to log into the website to perform certain functions including:

- Request transportation of Program materials
- Order Program supplies and marketing materials
- View previous requests for transportation, supplies and other materials

The website will also contain information for Producers and retailers to provide guidance on their obligations within the law, and information for how non-Participating producers can register with the Program.

Upgrades to the website will be performed on a rolling basis throughout 2014 and 2015. Marketing and promotion of the website will be an ongoing activity. A toll-free number will be displayed on the website and on printed marketing materials.

11.4 Program Branding

The following Logo, tagline and images will be used to maintain consistent Program branding.

LOGO AND GRAPHIC IMAGE ELEMENTS	DESCRIPTION
	<p>Logo always features the words “LightRecycle Washington” and a CFL icon with a circular arrow around it. The logo and icon are available in a variety of file formats for use in different applications.</p>

	CFL (Compact Fluorescent Light)
	Fluorescent Tubes
	HID (High Intensity Discharge)

11.5 Communication Channels

Communication will begin with earned media (press releases) and advertising at light retailers and collection sites through the use of info post cards and signage as previously discussed. PCA will collaborate with other entities in the development and implementation of public education, outreach, and marketing efforts. Paid advertising channels will be used to create consumer awareness. The communication program will include:

Website - see “LightRecycle Washington Website” above.

Earned Media – PCA will use press releases and public service announcements and other methods where possible to raise awareness of the Program and the benefits of recycling.

Paid Advertising – PCA will plan and execute a variety of paid advertising campaigns. The initial advertising mix will be determined in 2015 and may include radio, printed periodicals, outdoor, Internet and others.

Spanish Language Advertising – Spanish language marketing activities will be planned and are especially likely to occur in print, radio and social media.

Retail and Collector Materials – The most continuous component of the education and outreach element of the Program is the production and distribution of educational materials to Collection Sites and lighting retailers. Additional marketing materials can be downloaded or requested (at no charge) from the LightRecycle Washington website.

Partnerships - The Program will seek to partner with organizations interested in promoting LightRecycle Washington. Collaboration strategies will be developed through discussions with potential partners such as:

- **Other Stewardship Programs** - Opportunities to combine communication efforts with existing stewardship programs will be explored.
- **Municipal and County Partnerships** - The Program will seek opportunities to partner with local governments. These activities may include participating in community recycling events, partnering with local HHW collection programs and linking local government websites to the Program website.
- **Utilities** - Many utility companies have extensively promoted the use of energy efficient fluorescent lighting to their constituents and developed collection networks for recycling lights. The Program will investigate opportunities to work with utilities to reach target consumers, ensure consistent messaging and maximize collection.
- **Environmental Organizations** - These groups play an important role in supporting and promoting product stewardship programs. The Program will work with these entities to communicate the dangers and health impacts of mercury pollution and how to recycle mercury-containing lighting.
- **State** - Provide the Ecology-staffed 1-800-Recycle Hotline with Program and Collector information for their database so that the public can find collector locations. The Program will provide producer information to Ecology for their website. Retailers will be able to find an updated list of Participating Producers from the Ecology website.
- **Producers** - NEMA and Participating Producers will be encouraged to add Program information to their websites and promote the Program where possible.

Social Media - With input from social media experts, LightRecycle Washington will develop a social media strategy to promote the Program. PCA will also seek opportunities to promote the Program on existing social media sites that are managed by the Department of Ecology.

11.6 Public Review Process

As required in the rules (WAC 173-910-450), the Department of Ecology posted the initial Program Plan online for review by all stakeholders during a three-week period during June and July 2014. Ecology and PCA sought and gathered numerous comments throughout the state from lighting producers, policy experts, waste management professionals, Department of Ecology personnel and others. The comments were then organized by section and summarized in cases where multiple stakeholders made similar comments about a particular section or aspect of the Program Plan. Meetings, phone calls and conference calls were held between PCA and Ecology to discuss comments on the plan. Every comment was considered and many were specifically addressed in subsequent revisions of the Program Plan.

APPENDIX A - PARTICIPATING PRODUCERS AND BRANDS

The following list identifies the Producers who have sent a Letter of Intent to PCA indicating their intention to join the Program. PCA will continue to actively recruit all obligated Producers prior to the Program start.

List of Participating Producers

	Company Name and Website	Phone	Address
1	Ace Hardware Corporation www.acehardware.com	630-990-6600	2200 Kensington Court Oak Brook, IL 60523

Cumulative Reserve	84,876	366,310	583,648	802,062	983,102

APPENDIX C – COLLECTION SITE LOCATIONS

Collection Site Location Requirements

The following table shows the number of registered Collections Sites by county and city. The number of Sites meeting the requirements of the law for Collection Sites (1 per county and 1 per city with a population over 10,000) are under the heading "# Sites (Accepts ALL)".

The number of Sites under the heading "# Sites, (CFL Only)" do not meet the collection site requirement in the law since they do not accept all Program Products, however they accept CFLs only.

Locations with the letters "CE" under the heading "Collection Events" indicate sites in which two collection events (per location) are planned for 2015 unless a Collection Site can be registered for that area before the collection events are scheduled.

	County	City	Size	# Sites (Accepts ALL)	# Sites (CFL Only)	Collection Events
1	Adams	county location	no city > 10K	CE		CE
2	Asotin	county location	no city > 10K	1

APPENDIX D – COLLECTION SITE GUIDELINE

The following pages show the Collection Site Guideline provided to Collection Sites as of December 1, 2014. The Program may change the Collection Site Guideline, supplies and marketing materials over the course of the Program. When the Collection Site Guideline is revised, Collection Sites will be notified and provided with an updated copy. The most up to date version of the Collection Site Guideline can also be downloaded at this Web address:

Program Overview

Thank you for becoming a Collection Partner in the Washington State Recycling Program, **LightRecycle Washington**. These guidelines are provided to help ensure safe management and transportation of mercury-containing lights that are dropped off at your Collection Site.

Our Collection Partners enhance their communities and our State by helping reduce the number of mercury-containing lights that enter our landfills. Retail Collection Partners also benefit from increased customer traffic and from letting their community know that they care about the environment.

This document is intended to provide practical guidance to collectors in the LightRecycle Washington program and should be used to train personnel in the handling and management of Program materials. In addition, all collectors must comply with the requirements of the Mercury-Containing Lights Law (RCW 70.275) (the “Law”) and rule WAC 173-910-520. For more information, visit: www.ecy.wa.gov/programs/swfa/mercurylights

How the Program Works

Washington State residents bring unwanted mercury-containing fluorescent tubes/bulbs and High Intensity Discharge (HID) lights to authorized Collection Sites during business hours. As stated in the Law, collections sites can accept **up to 10 lights on any given day** from any individual, business or organization in Washington State. **There is no charge to drop the lights off.** Collection sites safely store the lights using containers and supplies provided by the program. The Program picks up full collection containers and provides replacement empty containers. . See Section 3 below for information on how to arrange the pick up of full containers and the re-supply of empty containers.

Safety

Fluorescent tubes, bulbs and HID lights accepted by the Program contain a small amount of mercury, which can pose a risk to human health and the environment if the light is broken. Take care when handling lights to prevent breakage. If a light is broken, open a window or door, leave the immediate area where the breakage occurred and consult the broken light handling procedure in Section 4 of this manual. Clean-up information is also available at the Washington State Department of Ecology Website:

www.ecy.wa.gov/mercury/mercury_bulb_cleanup.html.

LightRecycle Washington

LightRecycleWA.org

info@LightRecycleWA.org

Phone: (877) 592-2972 x 354

Fax: (206) 343-7445

Section 1: Approved Materials for Collection

Washington State residents, businesses and other organizations can drop-off up to 10 mercury-containing lights per day at any authorized Collection Site.

Collection Partners accept the lights for recycling, store them in provided containers, and call for pick-up when containers are full. The LightRecycle Washington program provides all containers, supplies, transportation and recycling services.

ACCEPTED LIGHTS:

Accepted Lights: LightRecycle Washington will accept lights that contain mercury and provide functional illumination in homes, businesses, and outdoor stationary fixtures. The most common categories of these lights are described below.

ALL SHAPES AND SIZES OF THESE LIGHTS ARE ACCEPTED

Compact Fluorescent Lights (CFL's)

CFLs are known for their “corkscrew” design, but also come in a wide range of shapes, sizes and styles.

Fluorescent Tubes

Straight (or linear) fluorescent tubes come in sizes from one to eight feet. Other fluorescent tubes include U-shaped, circular and other curved shapes.

High Intensity Discharge (HID)

HID lamps come in a variety of shapes and sizes. HID lamp types include High Pressure Sodium, Mercury Vapor, Metal Halide, Ultraviolet (UV), Ultra High Performance (UHP) and Germicidal.

For further assistance in identifying accepted lights, including definitions and pictures, please refer to Appendix C.

NO CHARGE DROP-OFF

Under this program, no fees can be charged to customers dropping off accepted lights for recycling.

ACCEPTING BROKEN LIGHTS

Fluorescent tubes and bulbs that have been broken accidentally can be accepted at your collection site. Residents may bring their broken bulb and the materials used to clean it up (such as paper towel or cardboard) in a sealed plastic bag or other air-tight container. If a resident brings in a broken light, ensure it is in a sealed container and add it to the other materials that are being collected for recycling.

The program does not accept lights that have been intentionally crushed in quantities, either manually or mechanically (i.e. by a drum-top crusher, also known as a bulb crusher).

NON-PROGRAM LIGHTS AND PRODUCTS

LightRecycle Washington only accepts mercury-containing lights (lamps, bulbs and tubes) that contain mercury and provide functional illumination in homes, businesses, and outdoor stationary fixtures.

The Program does not accept incandescent, halogen, LED, or other lights that do not fit the above description. Collection sites can use LightRecycle Washington promotional literature to help explain this limitation to consumers. LightRecycle Washington provides this literature to Collection Sites at no charge.

LightRecycle Washington is not responsible for non-program materials accepted at Collection Sites.

Section 2: Collection Site Set-Up

LightRecycle Washington will provide each Collection Site with supplies and marketing materials needed to collect materials safely and effectively.

SUPPLIES

Collection Sites will be provided with:

- Boxes for all bulbs and u-shaped and curved tubes
- Boxes or fiber drums for fluorescent tubes (4 feet or less)
- Boxes or fiber drums for fluorescent tubes (over 4 feet and up to 8 feet)
- Broken Light Clean-up Kit

NOTE: Boxes will ship flat with a plastic liner and re-closable zip tie and require minimal assembly prior to use.

SIGNAGE AND MARKETING MATERIALS

Signage and promotional materials are intended to raise awareness about recycling lights. Examples of promotional pieces may include:

- Window Sign
- Brochure and/or rack card, detailing the recycling program
- Promotional Magnets
- Shelf Talkers
- Door Stickers
- Counter Stands (for 8.5" x 11" flyer)

These materials are provided at no charge to Collection Partners and can be re-ordered by:

- Telephone:
- Order online at www.LightRecycleWA.org.

Please display signage and promotional pieces prominently.
Contact us with questions, feedback, or to request additional materials.

CHOOSING A STORAGE LOCATION

You will need a storage location for collected lights and program supplies. Recommendations for the storage location include:

- Select a storage location that can easily be accessed by personnel who are carrying lights that have been dropped off, but is away from high-traffic areas.
- Storage area should be inaccessible to the public (i.e. authorized personnel only) except in settings designed for supervised self-service.
- It should be easy to move full containers of lights from the storage area to transport vehicle.
- The floor surface should be impervious, and the area should be dry, protected from the weather and free of debris and away from drains. Wet lights cannot be transported for recycling.
- The space used for collection containers must hold a minimum of:
 - two boxes for bulbs (approx. 14" x 10" x 24"),
 - two boxes for 4-foot fluorescent light tubes (8" x 8" x 48") and
 - one box for 8-foot fluorescent light tubes (8" x 8" x 96").

- Secure the area during non-operating hours.
- The storage location must be equipped with a Broken Light Clean-up Kit provided by the Program.

PUBLIC ACCESS AND SECURITY

The Collection Site is only required to accept lights during regular business hours. However, if lights accepted by the Program are abandoned at the Site when closed, please add them to your collected materials for recycling.

Section 3: Collecting and Storing Lights

LIGHTS SHOULD BE HANDLED, STORED AND TRANSPORTED CAREFULLY TO AVOID BREAKAGE. LIGHTS COLLECTED THROUGH THIS PROGRAM WILL BE MANAGED AS UNIVERSAL WASTE.

FOR MORE INFORMATION, REVIEW THE WASHINGTON STATE UNIVERSAL WASTE RULE FOR LAMPS, WAC 173-303-573(5).

At retail store collection locations and some municipal facilities, lights will be received by site personnel and placed in containers at the designated storage area. Customers and visitors should not have access to the collection containers. Some municipal facilities may allow individuals to place the lights into the containers themselves during operating hours, as long as site personnel is available to answer questions regarding acceptable materials and quantities.

CFLs, HIDs and u-shaped or circular tubes go in the smaller boxes. Linear tubes are placed in boxes for the appropriate length (tubes that are 4 feet or under should go in the 4-foot boxes. Tubes longer than 4 feet go in the 8-foot boxes). All containers will come with a plastic liner and re-closable zip tie.

The following methods will ensure safe light handling and risk minimization:

- Handle collected lights gently to prevent breakage. The lights should be handled by their bases, not the glass portion.
- Set lamps into the containers carefully. Do not drop, throw or toss lights.

- All containers will include a plastic liner which must be in place before the container is used to hold lights.
- Store the lights in a secure area where they will not be run into or toppled.
- Keep CFL, HID and shaped tubes separate from linear tubes.
- Do not tape or use rubber bands to hold bubs or tubes together. Tape must be removed before the lights are placed in the storage containers.
- Use provided containers to collect lights. The containers must remain structurally sound and lack evidence of leakage, spillage or damage.
- Broken lamps must be cleaned up immediately.
- Do not over-fill collection containers as they will be difficult and dangerous to close and may be rejected for shipping.
- Do not force fluorescent tubes in the collection container. If a tube does not slide into place within the container, the container is full.
- Do not stack material on top of collection containers.

PACKAGING

Cardboard boxes used to collect, store and ship CFL and HID lights are assembled and sealed like other boxes, with one important exception: **All open flaps must be sealed closed with packing tape.** This requirement, the plastic liner and re-closable zip tie, minimize leakage, even if the lights shift or break during transport.

Collection Box Assembly: Bulbs

1. Start by unfolding the flattened box into a square shape.

2. Fold Flap 1 and Flap 3 over the box opening until they meet in the middle.

3. Affix two (2) strips of packing tape down the middle of the flaps.

4. Fold Flap 2 and Flap 4 until they meet in the middle.

5. Affix two (2) strips of packing tape down the middle of the flaps. Make sure that the strips of tape reach down the side of the box at least six (6) inches (15 cm).

6. Affix two (2) strips of packing tape along each side of the box where the flaps were closed.

7. Ensure that all open edges of the bottom of the box are securely taped up

8. Open the plastic liner bag provided inside the box and fold the liner over the top end of the box

Upon completion of steps 1-8, the box is now ready for use.

Collection Box Assembly: 4 foot and 8 foot Tube boxes

Cardboard boxes used to collect, store and ship linear fluorescent lights are assembled and sealed like other boxes, with one important exception: **All open flaps must be sealed closed with packing tape.** This requirement, the plastic liner and re-closable zip tie, minimize leakage, even if the lights shift or break during transport.

1. Start by unfolding the flattened box into a rectangular shape.

Note: All four flaps are full flaps.

2. Fold Flap 1 and Flap 3 over the box opening.

3. Affix two (2) strips of packing tape along the edge of the box where the flap is closed.

4. Fold Flap 2 over.

5. Affix two (2) strips of packing tape along each of three (3) edges of the box where the flap was closed.

6. Fold Flap 4 over.

7. Affix two (2) strips of packing tape along each of the three (3) edges of the box where the flap was closed.

8. Make sure all the open edges of the bottom of the box are securely taped up.

9. Open the plastic liner bag provided inside the box and fold the liner over the top end of the box.

Upon completion of steps 1-9, the box is now ready for use.

Taping Method for Full Bulb Boxes

Cardboard boxes used to collect, store and ship CFL and HID lights are assembled and sealed like other boxes, with one important exception: **All open flaps must be sealed closed with packing tape.** This requirement, the plastic liner, and re-closable zip tie, minimize leakage, even if the lights shift or break during transport.

1. Once the box is full, open the flaps as shown (top view).

2. Fold Flap 1 and Flap 3 over the box opening until they meet in the middle.

3. Affix two (2) strips of packing tape down the middle of the flaps.

4. Fold Flap 2 and Flap 4 until they meet in the middle.

5. Affix two (2) strips of packing tape down the middle of the flaps. Make sure that the strips of tape reach down the side of the box at least six (6) inches (15 cm).

6. Affix two (2) strips of packing tape along each of the box where the flaps were closed.

Taping Method for Full Fluorescent Tube Boxes

Cardboard boxes used to collect, store, and ship linear fluorescent lights are assembled and sealed like other boxes, with one important exception: **All open flaps must be sealed closed with packing tape.** This requirement, the plastic liner, and re-closable zip tie minimize leakage, even if the lights shift or break during transport.

1. Once the box is full, open the flaps as shown (top view).

Note: All flaps are full flaps.

2. Fold Flap 1 and Flap 3 over the box opening.

3. Affix two (2) strips of packing tape along the edge of the box where the flap is closed.

4. Fold Flap 2 (full flap) over.

5. Affix two (2) strips of packing tape along each of the three (3) edges of the box where the flap was closed.

6. Fold Flap 4 (full flap) over.

7. Affix two (2) strips of packing tape along each of the three (3) edges of the box where the flap was closed.

PREPARING COLLECTED MATERIALS FOR TRANSPORT

The collected lights should be stored and packaged in a way that avoids breakage.

- Do not tape bulbs or tubes together or use rubber bands.
- Do not overfill containers.
- Close the liner bag securely with the re-closable zip tie and seal containers so that they will not leak, even if the contents shift or break during transport.
- Check that the box is structurally sound and has no evidence of damage.
- Seal boxes with packing tape in preparation for ship-out. Please see the Taping Methods above for both types of boxes.

PREPARING AND ARRANGING FOR TRANSPORT

Timing: You should order a pick-up at least two weeks before all of your containers are full. Do not wait until you are down to your last empty box.

Before scheduling a pick-up, make sure that containers being shipped are sealed securely for transport. Transport vehicles that have been scheduled may not wait once they have arrived on site.

- a. The carrier will arrive at your location with a Bill of Lading (BOL) to document the pick-up. It will already be completed with the number of pieces they are picking up.
- b. Review the BOL for the pick-up. Confirm that it is complete and make any changes that are necessary. Double check these items to be sure they are correct:
 - i. The number of boxes and category of materials they contain (i.e. fluorescent lights, CFLs or HIDs)
 - ii. The Collection Site address

It is your responsibility to make sure that shipping information is correct.

HOW TO ORDER A PICK UP

Large Collection Sites	Small Collection Sites
<p>Shipping <u>fiber drums, pallet boxes</u> or <u>at least five boxes</u> at a time.</p> <p><u>To schedule a Pick-up use one of these two methods:</u></p> <ol style="list-style-type: none">1. Log in at LightRecycleWA.org and complete the Schedule a Pick-up/Supply Order form.2. Call EcoLights at (888) 214-2327 to arrange transportation or order supplies	<p>Shipping less than five boxes at a time, using recycling kits that ship via FedEx.</p> <p><u>Single boxes can be placed with other boxes that are being picked up by FedEx.</u></p> <p><u>If no regular FedEx pick-up schedule is in place, schedule a pick-up through FedEx online at www.fedex.com or by calling (800) GO-FEDEX.</u></p>

Section 4: Broken Lights at Your Collection Site

RISKS

Mercury containing lights contain a small amount of mercury, which is toxic and can pose a threat to human health and the environment if the light is broken. A careful and prompt cleanup of broken lights will minimize exposure to staff, customers and the environment.

Clean-up Procedure Web Pages:

WA Department of Ecology Fluorescent Light Clean Up:

www.ecy.wa.gov/mercury/mercury_bulb_cleanup.html

BROKEN LIGHT CLEAN-UP KIT

The program will supply each collection site with a kit for cleaning up broken fluorescent or HID lamps. If you need replacement items, please complete the Schedule a Pick-up/Supply Order form at LightRecycleWA.org or call EcoLights at (877) 214-2327.

CLEAN-UP PROCEDURE

Be careful not to break fluorescent bulbs. However, if a bulb breaks, do not panic; just follow these simple instructions:

**Avoid breathing vapors or touching broken materials.
Do not vacuum or sweep.**

1. Open windows to vent vapors for at least 15 minutes. Leave the area during this time.
2. Use stiff paper or cardboard to pick up large pieces.
3. Use duct tape to pick up small pieces and powder.
4. Wipe the area clean with a damp paper towel or wet wipe.
5. Place all materials in an air-tight container, such as a plastic bag that is completely sealed with tape. Be sure to include the broken light and any items that were used to clean it up.
6. Place the sealed bag in a light collection box. It will be processed for recycling.
7. Wash your hands.

Section 5: Record Keeping and Reporting

RECORD KEEPING

Maintain all records and documentation including applicable manifest, bill of lading, training records, and other data as required for a minimum of 2 years.

REPORTING INCIDENTS OR FINES

Injuries to collection site staff are extremely rare. However, should they occur, the collection site will provide notice of the following to the program:

- Incidents of these types must be reported to LightRecycle Washington within 24-hours of the occurrence:
 - Injuries requiring the assistance from a Doctor or first responders
 - Incidents that are reported to OSHA (Occupational Safety and Health Administration)
- Any regulatory orders or fines within 48 hours of receiving such orders or fines

Phone: (877) 592-2972 x 354

Fax: (206) 343-7445

Section 6: Training

Collection Sites are responsible for training employees in safe and effective program procedures. The program is designed to be self-directed, using this manual as a guideline.

This guideline is intended to provide practical guidance and best management practices for the handling and storing of products collected under the Washington Mercury-Containing Lights Product Stewardship Program. This guideline should be used by Collection Site managers to instruct staff in required program practices.

The practices described in this guideline are not intended to replace or relieve the site operator or staff of any standards, acts or regulations required under local, state or federal law.

PCA Product Stewardship, Inc. accepts no responsibility and assumes no liability resulting from the incorrect use of information contained in this guideline or from the use of this information in any circumstances other than those described.

All collection site workers must understand these Guidelines and have a clear understanding of:

- The handling and management of lights including but not limited to:
 - Potential hazards and risks associated with handling lights
 - Proper and safe handling and packaging of lights
 - Ways to reduce risk
 - Safety and emergency procedures
- Broken light clean-up procedures
- The operations training program and policies/procedures set by the program
- The identification of program and non-program products
- The completion of proper shipping documentation and record keeping

Newly hired employees must be instructed on the information in these Guidelines before they are permitted to handle lights.

Collection Site Operators should schedule regular training sessions with staff members who have emergency response responsibilities. This will help keep staff informed and up to date on Program procedures.

Appendix A – Collector Requirements

All authorized, LightRecycle Washington Collection Sites agree follow these Collector Requirements:

- (1) Mercury-containing lights must be collected free of charge. Collection Sites cannot charge for lights that are dropped off and recycled through the LightRecycle Washington program.
- (2) Collectors may not intentionally crush or process collected lights. All collected lights must be sent to the LightRecycle Washington authorized processor for recycling.
- (3) Collectors must comply with the standards for collection small quantities of universal waste (WAC 173-303-573), as well as all other applicable laws, rules, and local ordinances. Collection Site guidelines provided by the Program will outline these responsibilities.
- (4) As an approved collection site, you must:
 - (a) Staff the site during operating hours;
 - (b) Notify LightRecycle Washington of changes in hours and days of operation;
 - (c) Handle collected lights in a way that prevents releases of mercury to the environment;
 - (d) Have a mercury release response plan that describes the materials, equipment, and procedures to clean up broken lights. (LightRecycle Washington will provide you with one if you do not have one of your own.)
 - (e) Have a worker safety plan (provided by LightRecycle Washington) that describes safe handling procedures to protect worker health and safety;
 - (f) Package and ship collected lights using supplies provided by LightRecycle Washington. These supplies are designed to minimize the release of mercury into the environment by volatilization (or any other means) and reduce breakage.
- (5) A collector must allow the Washington State Department of Ecology or LightRecycle Washington access for inspections to determine compliance with the Collection Site requirements.
- (6) No entity may claim to be collecting mercury-containing lights for LightRecycle Washington unless the entity is registered with LightRecycle Washington as a collector and submits all collected mercury-containing lights to transporters and processors authorized by LightRecycle Washington.
- (7) All Collection Site locations must maintain general liability insurance of at least \$1,000,000 per occurrence. If requested by the Washington State Department of Ecology or LightRecycle Washington, the Collection Site must provide documentation indicating that the liability policy is in place with contact information for the insurance carrier or agent.
- (8) Any collector found to be out of compliance with the collector requirements will have its participation in the program cancelled.

Appendix B – Forms

Appendix C – Accepted and Not-Accepted Products List

The program includes all lamp mercury-containing lights including:

Accepted Products	
Fluorescent Tubes - Straight/Linear	
Includes all diameters and light outputs in a straight/linear configuration. Can range in size from under 2 feet in length to 8 feet in length.	
	
Fluorescent Tubes - Curved/Circular	
Includes all diameters and light outputs in a curved/circular configuration (curved, square, U, etc.).	
	
UV and Germicidal Lamps	
UV or germicidal lamps of all shapes and sizes. All base types including pin-type, screw-in, etc.	
	

Accepted Products

Compact Fluorescent Lamps (CFLs)

Fluorescent bulbs that are typically similar in size and intended to replace an incandescent (traditional) light bulb.

High Intensity Discharge (HID) and Other

Includes these HID types: high pressure sodium, mercury vapour and metal halide. These lamps vary in size but are much larger than a typical bulb. In some cases, they can be as big, or bigger, than a football.

Pictures are shown as illustrative examples only and should not be considered an endorsement of any brand or supplier

NOT Accepted • Non-Program Products

Halogen and Incandescent- Bulbs

Filament lamps of all shapes, sizes and wattages. All base types including pin-type, screw-in, etc.

Light Emitting Diodes (LED)

Solid-state lamps used for specialty purposes and conventional lighting applications. All base types including pin-type, screw-in, etc.

Fixtures / Decorative Light Strings

APPENDIX E – COLLECTION SITE REGISTRATION INFORMATION

The following pages show the registration information for all registered Collection Sites.

Subject: Collection Site Registration

Date: Tuesday, November 4, 2014 1:21:26 PM Pacific Standard Time

From: City of Rock Island (sent by <info@LightRecycleWA.org>)

To: peter@lightrecyclewa.org

Submitted on Tuesday, November 4, 2014 - 13:21

Washington State Mercury-containing Light Product Stewardship Program
Collection Site Agreement

This Agreement dated and effective as of the 1st day of January, 2015.

Between:

PCA Product Stewardship, Inc. (PCA), a non-profit corporation registered in Washington,
having a place of business at: 6020 Sycamore Ave. NW, Seattle, WA 98107
("PCA"),

and

Collector Business or Organization Name: Snohomish County

Business Legal Name (if different):

Contact Person: Sego Jackson

Phone: 425-388-6490 Fax: 425-388-7044

E-mail: sego.jackson@snoco.org

(the "Collector")

Collection Site Address (or list multiple locations as an Addendum to this agreement).

See Addendum A

Phone: _____ **Fax:** _____

Operating Days and Hours: _____

Collection Site information (if different from above)

Collection Site Operator's Name: _____

Collection Site Operator's Mailing Address (if different)

Collection Site Operator's Phone: _____

Collection Site Operator's E-mail: _____

(the "Site")

Whereas:

- A. PCA is the designated stewardship organization for the Washington State mercury-containing lights product stewardship program (the "Program") and is operating the Program pursuant to the product stewardship plan as approved by Washington State Department of Ecology.
- B. The Program requires authorized collection sites.
- C. The Collector operates one or more solid waste and moderate risk waste collection facilities in Snohomish County.
- D. The parties wish to enter into this Agreement, which describes the terms and conditions under which the Collector will operate certain authorized collection sites for the Program for the products managed by the Program.

For good and valuable consideration, the parties agree as follows:

The parties wish to enter into this Agreement, which describes the terms and conditions under which the Collector will operate authorized collection site(s) for the Program.

1.0 Definitions:

1.1 "**Collection Site Guidelines**" means the compendium of information developed to assist collection sites in managing the collection and storage of Program Products in a way that will minimize the risk of personal injury and harm to the environment. Guidelines will be updated by PCA from time to time. A copy of the Collection Site Guidelines are attached hereto and incorporated herein as Attachment A.

1.2 "**Covered Entity**" or "**Covered Entities**" means any household generator or person (defined in the Law as "...sole proprietorship, partnership, corporation, non-profit corporation or organization, limited liability company, firm, association, cooperative, or other legal entity located within or outside Washington state") who purchased the mercury-containing light at retail and delivers no more than ten mercury-containing lights to a registered collector on any given day.

1.3 "**Non-program Products**" means products not covered or included in the Program.

1.4 "**Program**" means the mercury containing lights product stewardship program operated in accordance with the provisions of the Revised Code of Washington (RCW) 70.275 (the "Law").

1.5 "**Program Products**" means lamps, bulbs, tubes, or other devices that contain mercury and provide functional illumination in homes, businesses, and outdoor stationary fixtures, consisting mainly of compact fluorescent lamps and fluorescent tubes.

2.0 Designated Authorized Collection Site(s)

The collection sites identified above are hereby designated authorized collection sites for the collection of Program Products. This designation authorizes Collector to receive Program Products as set forth herein.

3.0 PCA Responsibilities

3.1 PCA will supply or provide:

- (a) Collection Site Guidelines and updated versions when available;
- (b) collection containers for Program Products;
- (c) transportation services for the delivery of empty collection containers and pickup of full collection containers; and
- (d) broken light clean-up kit
- (e) posters, banners and/or other signage;

- (f) management and recycling or proper disposal of the collected lamps in accordance with the Program Plan and applicable laws and regulations.
- (g) education and promotion relating to the Program.

4.0 Collector Responsibilities

4.1 The Collector agrees to provide collection services at the Site to the Program in accordance with the following Program requirements:

- (a) Program Products must be accepted from Covered Entities free of charge up to the daily limits provided in RCW 70.275.020 as described in the Collection Site Guidelines. The Collector shall be responsible for any products including Program Products accepted from entities other than Covered Entities, or from Covered Entities in excess of the daily limits provided in the RCW 70.275.020.
- (b) all collected Program Products accepted from Covered Entities up to the daily limits provided in the Law must be provided to a transporter or processor authorized by PCA.
- (c) Collector must comply with the standards for collection of small quantities of universal waste (WAC 173-303-573), as well as all other applicable laws, rules, and local ordinances. Collection Site Guidelines provided by PCA will outline these responsibilities.

4.2 As an authorized collection site, the Collector must:

- (a) notify PCA of changes in hours and days of operation;
- (b) handle collected lights in a way that prevents releases of mercury to the environment;
- (c) not intentionally crush or process collected Program Products.
- (d) have a mercury release response plan that describes the materials, equipment, and procedures to clean up broken lights.
- (e) have a worker safety plan that describes safe handling procedures to protect worker health and safety;
- (f) package and ship collected lights using supplies provided by PCA.
- (g) ensure Collector's staff are trained in the safe handling, storage and packaging of lights.
- (h) take reasonable measures to protect the collection containers supplied by the Program and their contents;
- (i) prepare full collection containers in accordance with the Collection Site Guidelines for pick-up by the contracted transporter or courier company appointed by PCA.
- (j) complete required documentation as specified in the Collection Site Guidelines;
- (k) display collection site signage and or posters provided by the Program;
- (l) make Program promotional materials, supplied by PCA, available to customers;
- (m) provide and maintain a storage area for Program Products that is secure, weather tight and in compliance with local, state, and federal regulations.
- (n) provide on-site staff assistance or oversight of public drop-off area to ensure only Program Products are accepted.

4.3 The Collector must allow the Washington State Department of Ecology or PCA access for inspections to determine compliance with the Collection Site requirements.

4.4 The Collector acknowledges that no payment will be made to the Collector by PCA under this agreement. The parties may negotiate payments to the Collector for other non-collection services provided by the Collector.

5.0 Agreement Term and Termination

5.1 The term of this Agreement shall be continuous, without a specified termination date. PCA or Collector may terminate this Agreement at any time upon 120 days' written notice to the other party, without cause, and following termination the Collector agrees to make available for pick-up all materials supplied to Collector by the Program.

5.2 If a party:

- (a) fails in the strict performance of any part of this Agreement; or
- (b) is sold, liquidated, or becomes insolvent, or if a custodian or receiver is appointed for its business or any of its property, or if the party makes an assignment, proposal, or arrangement for the benefit of creditors, or if it files or has filed against it a petition of bankruptcy that is not dismissed within 30 days after filing, or if the party discontinues its business for any reason,

the other party shall have the right upon the occurrence of such event to terminate this Agreement at any time thereafter.

6.0 Risk Management

6.1 The Collector shall maintain, at its own expense, adequate insurance (the "Insurance") for the services to be performed under this Agreement, including the insurance coverage set out below:

- (a) general liability coverage with limits of not less than \$1,000,000 (one million dollars) per occurrence; If requested by the Washington State Department of Ecology or PCA, the Collector must provide documentation indicating that the liability policy is in place with contact information for the insurance carrier or agent.
- (b) Workers Compensation Insurance (statutory)

provided that if for any reason the Collector does not have the required insurance, the parties acknowledge that the Collector is an independent contractor supplying services to PCA under this Agreement at the Collector's own risk, including, without limitation, risk of fire, property, personal injury or any other loss or damage of any nature whatsoever arising from the Collector's performance of the services under this Agreement.

6.2 PCA shall maintain pollution liability insurance with limits of not less than \$1,000,000 (one million dollars) per occurrence and shall ensure that authorized processors shall maintain pollution liability insurance with limits of not less than \$1,000,000 (one million dollars) per occurrence and that authorized transporters shall maintain automotive liability insurance with limits of not less than \$1,000,000 (one million dollars) per occurrence, \$1,000,000 policy aggregate limit.

6.3 Each party to this Agreement will be responsible for the negligent acts or omissions of its own employees, volunteers, officers, or agents in the performance of this Agreement. Neither party will be considered the agent of the other and neither party assumes any responsibility to the other party for the consequences of any act or omission of any person, firm, or corporation not a party to this Agreement.

7.0 Covenants of PCA

PCA covenants, represents and warrants to the Collector that:

- (a) PCA is a non-profit corporation validly existing under the laws of Washington;
- (b) the execution and delivery of this Agreement has been validly authorized by PCA.

- (c) PCA shall perform its obligations under this Agreement in a safe and efficient manner and in compliance with all local, state and federal laws, bylaws, regulations, and contractual terms applicable to the performance of its obligations under this Agreement, including, without limitation, applicable environmental laws such as Washington's universal waste law and regulations.
- (d) PCA's employees are qualified and trained to perform PCA's obligations under this Agreement;
- (e) PCA's licenses, permits, and any other authorizations required to operate its business, are, and shall be, in good standing during the term of this Agreement;

8.0 Covenants of the Collector

8.1 The Collector covenants, represents and warrants to PCA that:

- (a) the Collector is a municipal agency or a validly existing business entity in good standing and qualified to carry on business in Washington State.
- (b) the execution and delivery of this Agreement has been validly authorized by the Collector.
- (c) the Collector shall perform its obligations under this Agreement in a safe and efficient manner and in compliance with all local, state and federal laws, bylaws, regulations, and contractual terms applicable to the performance of its obligations under this Agreement, including, without limitation, applicable environmental laws such as Washington's universal waste law and regulations.
- (d) the Collector's employees are qualified and trained to perform the obligations of the Collector under this Agreement;
- (e) the Collector's licenses, permits, and any other authorizations required to operate its business, are, and shall be, in good standing during the term of this Agreement;
- (f) the Collector consents to the publication by the Program of the address, telephone number and hours of operation of the Site(s) and the promotion of the Site(s) as an authorized collection site.

9.0 Other

9.1 The Collector acknowledges that it is an independent contractor supplying services to, and not a subcontractor of, PCA, and that the Collector is participating in the Program under this Agreement at the Collector's own risk, including, without limitation, risk of fire, property, personal injury or any other loss or damage of any nature whatsoever arising from the Collector's performance of the services under this Agreement.

9.2 Notwithstanding anything contained in this Agreement, either party's performance of its obligations under this Agreement shall be suspended during a delay (the "Unavoidable Delay") caused by fire, strike or other casualty or contingency beyond the reasonable control of a party. Each party shall notify the other party of the Unavoidable Delay which may prevent the party from performing its obligations under this Agreement.

9.3 This Agreement shall be the entire agreement between the parties and supersedes any prior agreement. No party shall be bound by any warranty or agreement not included in this Agreement and, in particular, no warranty of a party not expressed in this Agreement shall be implied.

9.4 This Agreement may be executed in any number of counterparts, and each executed counterpart shall be considered an original. All executed counterparts taken together shall constitute the agreement.

9.5 Any communications under this Agreement shall be in writing and delivered by hand or transmitted by telecopy to the address and telecopy number of each party set out at the beginning of this Agreement.

TO EVIDENCE THEIR AGREEMENT each of the parties has executed this Agreement on the date set out above.

-----------------------	-----------------------

Collection Site Registration Requirements

- (1) Mercury-containing lights must be collected free of charge. Collection Sites cannot charge for lights that are dropped off and recycled through the LightRecycle Washington program.
- (2) Collectors may not intentionally crush or process collected lights. All collected lights must be sent to the LightRecycle Washington authorized processor for recycling.
- (3) Collectors must comply with the standards for collection small quantities of universal waste (WAC 173-303-573), as well as all other applicable laws, rules, and local ordinances. Collection Site guidelines provided by the Program will outline these responsibilities.
- (4) As an approved collection site, you must:
- (a) Staff the site during operating hours;
 - (b) Notify LightRecycle Washington of changes in hours and days of operation;
 - (c) Handle collected lights in a way that prevents releases of mercury to the environment;
 - (d) Have a mercury release response plan that describes the materials, equipment, and procedures to clean up broken lights. (LightRecycle Washington will provide you with one if you do not have one of your own.)
 - (e) Have a worker safety plan (provided by LightRecycle Washington) that describes safe handling procedures to protect worker health and safety;
 - (f) Package and ship collected lights using supplies provided by LightRecycle Washington. These supplies are designed to minimize the release of mercury into the environment by volatilization (or any other means) and reduce breakage.
- (5) A collector must allow the Washington State Department of Ecology or LightRecycle Washington access for inspections to determine compliance with the Collection Site requirements.
- (6) No entity may claim to be collecting mercury-containing lights for LightRecycle Washington unless the entity is registered with LightRecycle Washington as a collector and submits all collected mercury-containing lights to transporters and processors authorized by LightRecycle Washington.
- (7) Any collector found to be out of compliance with this section or the requirements of the plan will have its participation in the program cancelled.

I am authorized to register this location as a LightRecycle Washington Collection Site and I have read and agree to the Collection Site Registration Requirements for all locations.

Collection Site Registration

Collection Site Registration Requirements

- (1) Mercury-containing lights must be collected free of charge. Collection Sites cannot charge for lights that are dropped off and recycled through the LightRecycle Washington program.
- (2) Collectors may not intentionally crush or process collected lights. All collected lights must be sent to the LightRecycle Washington authorized processor for recycling.
- (3) Collectors must comply with the standards for collection small quantities of universal waste (WAC 173-303-573), as well as all other applicable laws, rules, and local ordinances. Collection Site guidelines provided by the Program will outline these responsibilities.
- (4) As an approved collection site, you must:
 - (a) Staff the site during operating hours;
 - (b) Notify LightRecycle Washington of changes in hours and days of operation;
 - (c) Handle collected lights in a way that prevents releases of mercury to the environment;
 - (d) Have a mercury release response plan that describes the materials, equipment, and procedures to clean up broken lights. (LightRecycle Washington will provide you with one if you do not have one of your own.)
 - (e) Have a worker safety plan (provided by LightRecycle Washington) that describes safe handling procedures to protect worker health and safety;
 - (f) Package and ship collected lights using supplies provided by LightRecycle Washington. These supplies are designed to minimize the release of mercury into the environment by volatilization (or any other means) and reduce breakage.
- (5) A collector must allow the Washington State Department of Ecology or LightRecycle Washington access for inspections to determine compliance with the Collection Site requirements.
- (6) No entity may claim to be collecting mercury-containing lights for LightRecycle Washington unless the entity is registered with LightRecycle Washington as a collector and submits all collected mercury-containing lights to transporters and processors authorized by LightRecycle Washington.
- (7) All Collection Site locations must maintain general liability insurance of at least \$1,000,000 per occurrence. If requested by the Washington State Department of Ecology or LightRecycle Washington, the Collection Site must provide documentation indicating that the liability policy is in place with contact information for the insurance carrier or agent.
- (8) Any collector found to be out of compliance with the collector requirements will have its participation in the program cancelled.

I am authorized to register this location as a LightRecycle Washington Collection Site and I have read and agree to the Collection Site Registration Requirements for all locations.
