**Subject:** Proposed rules to deny spraying for adult mosquitos  
**Date:** Thursday, March 04, 2010 10:15:08 AM

---

Dear sir:

I have been told that the Washington State Department of Ecology is proposing or about to adopt new rules that will deny request for spraying to control adult mosquitos in many parts of our county (Cowlitz). Those proposing such rules must live in mosquito free neighborhoods that are not affected by the almost unbearable nuisance of these pest. Anyone who has to deal with the adult mosquitos and the effect they have on our pets and other animals as well as ourselves must find it hard to understand why such rules would be adopted.

I hope this doesn't happen and be assured I will do all I can to stop it from happening.

WATER QUALITY PROGRAM

Jon Jennings – Mosquito Control Permit Comments  
Washington State Department of Ecology  
Water Quality Program  
P.O. Box 47600  
Olympia, WA 98504

Dear Mr. Jennings:

In years past I have called our mosquito control district with concerns about adult mosquitoes. They have helped me out by fogging in my neighborhood. I am concerned that The Mosquito Control Permit that is currently being considered will prevent the district from quickly responding to these problems.

I know the district spends a lot of time and money on larva control and I'm sure this helps, but they never seem to get them all. Mosquito control programs must be allowed to control adult mosquitoes as well. I am asking you to reword the permit so that we can continue to have adult mosquito control when needed.

We expect our mosquito control district to respond when we call with a mosquito problem. We pay for this service with tax dollars because we want to enjoy the outdoors during the summer months. Don't write rules that will prevent our district from fogging when we have so many mosquitoes that we need to call for their help.

Sincerely,

James E. Day
