

# Taking Ownership of Your Data

Department of Ecology  
Ozone/Nephelometer Workshop  
April 2005

# Taking Ownership of Your Data

- It's Monday, do you know where your data is?
- Hopefully, safely on its way to the data acquisition (telemetry) system.

# Taking Ownership of Your Data

- If data from your site isn't flowing to the system, who is responsible?
- In most cases, you the operator are.

# Taking Ownership of Your Data

- Are you watching your sites and data daily?
- You should be.
- It's easy!
- <https://fortress.wa.gov/ecy/aqp/Site/>

# Taking Ownership of Your Data

- Do we monitor your sites and data?
- Yes we do!
- Remember you are too! Daily, right?
- We still need your help though.
- We often can see something is wrong, but not pinpoint exactly what.
- That's where you come in.

# Taking Ownership of Your Data

- What should you do if you find problems?
- First, check it out whatever it is.
- Easy fix? Good news!
- Not so easy fix?
- Call us. We want to know. Really!
- Chances are we can help you.

# Taking Ownership of Your Data

- Equipment problems?

- Check it out and contact us:

David Bumgardner @ 360-407-6030

# Taking Ownership of Your Data

- Data Logger or Telemetry issues?

- Check it out and contact us:

Joan Kiely @ 360-407-6839

# Taking Ownership of Your Data

- Data request or Air Quality System issues?

- Contact us:

Joan McMillen @ 360-407-7267

# Taking Ownership of Your Data

- The bottom line of successful air monitoring is:
  - Valid data
  - It's why we're here.

# Taking Ownership of Your Data

- To provide you more detail about Taking Ownership of Your Data, is our Quality Assurance Coordinator, Stan Rauh.
