

Memo to File

Date: February 5, 2009
To: Dan Zandell
From : Jim Khorsand 
Re: 2001 / 2002 Alstom LNCFSIII discussion

Dan,

This is intended to document the telephone conversation that took place on December 12 of last year between us here at the Centralia Plant (Gary MacPherson, Dan Zandell, and myself) and the Alstom low Nox boiler conversion experts (Dale Moreland, Doug Hart, and Bob Grasso) regarding the level of sophistication of the low Nox burners modification installed in 2001& 2002 in Centralia boilers. Dale, Bob, and Doug confirmed that these installed components (LNCFS III) are still considered the *"latest generation"*.
