1 Addendum H – SWOC Closure Units

2 **H. Consolidated Closure Plan for the Solid Waste Operations Complex Closure**  
3 **Units**

4 These Closure Plans (Plans) specify the performance standards and describe the process for final closure  
5 of the Dangerous Waste Management Units (DWMUs). Upon termination of operations, the  
6 owner/operator shall willfully close the DWMUs in accordance with the applicable Washington  
7 Administrative Codes (WAC)/ *Resource Conservation and Recovery Act of 1976* (RCRA) closure  
8 requirements promulgated at WAC 173-303-610 (40 CFR 264, Subpart G). The activities and closure  
9 performance standards described herein apply only to wastes and waste constituents regulated under  
10 WAC/RCRA. In this Plan, the term “decontamination” refers to the removal of WAC/RCRA-regulated  
11 wastes and waste constituents.

12

13 **H.1 Closure Requirements [WAC 173-303-610 and WAC 173-303-630(10); 40 CFR**  
14 **Part 264, Subpart G and 270.14(B)(13)]**

15 These Plans satisfy the requirements of WAC 173-303-610 [40 CFR 264.112(a)] that waste management  
16 units have written closure plans. Of the additional requirements at WAC 173-303-610(2)(b) [40 CFR  
17 264.111(c)], only those at WAC 173-303-630(10) (40 CFR 264.178) apply. Closure of the DWMUs in  
18 accordance with these Plans satisfies the requirements of WAC 173-303-610 and WAC 173-303-630(10)  
19 (40 CFR 264, Subpart G and 40 CFR 264.178).

20 Although closure under WAC/RCRA is primarily concerned with the hazardous waste constituents in the  
21 dangerous waste managed at the DWMUs, closure is performed with awareness of the radiological  
22 component and the threat to human health and the environment by that component. Closure will be  
23 performed to ensure the safety of personnel, as follows:

- 24 • Qualified personnel will supervise and perform closure activities in compliance with established  
25 safety procedures,  
26 • Personnel will be equipped with appropriate PPE and trained in applicable safety procedures.

27 While the health and safety of personnel is of the utmost priority, closure activities will be performed in a  
28 manner to minimize waste generation.

29 Information specific to the closure of the Solid Waste Operations Complex (SWOC) Closure Units is  
30 presented in Addendum H. The information pertaining to the closure of the LLBG Trenches 31-34-94 is  
31 presented in Addendum H1; T-Plant Complex specific SWOC Units in Addendum H2; and CWC-WRAP  
32 specific SWOC units is presented in Addendum H3.
