E SECURITY

This Addendum discusses security requirements as related to WESF. WESF is operated to minimize exposure of human health and the environment to the mixed waste capsules. Shielding, contamination control, control of toxic or dangerous material, and safety and security procedures will be used to keep exposure ALARA. Shielding will be provided to comply with the ALARA as required by [10 CFR 835](#).

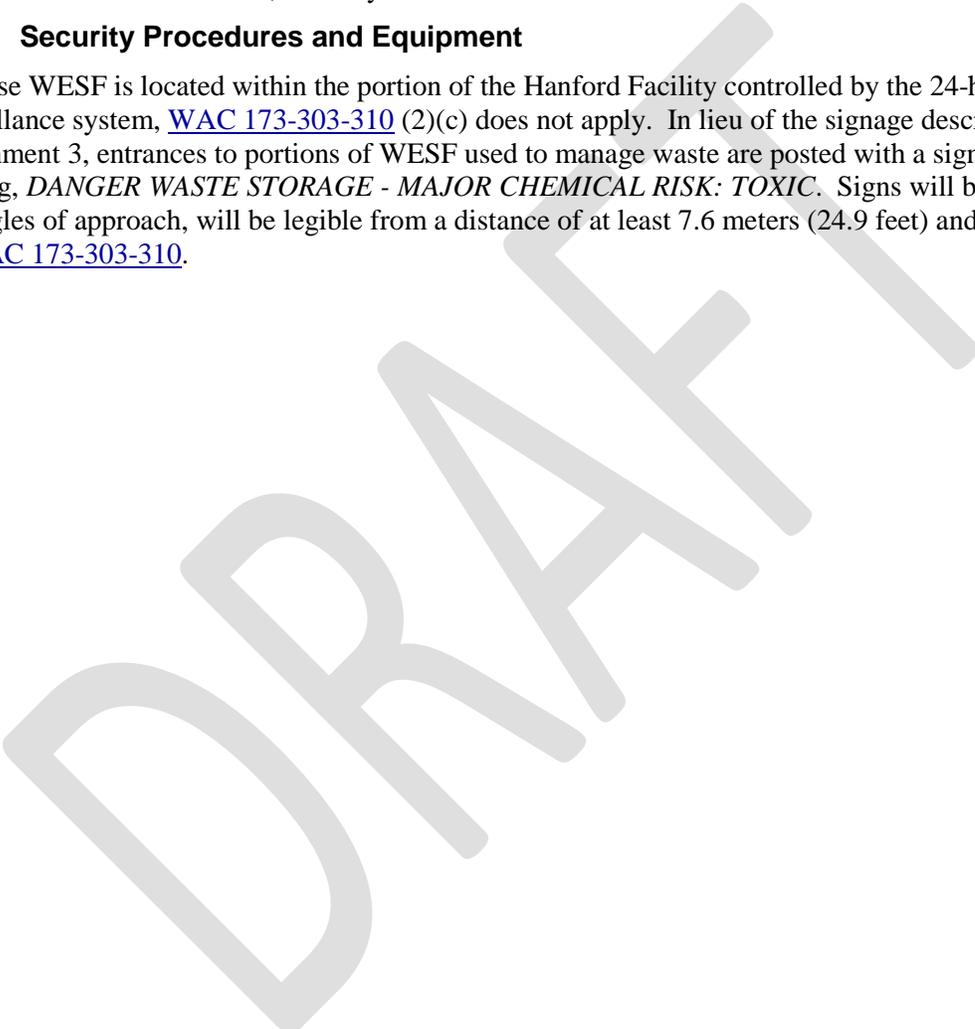

The mixed waste is in solid form and placed in stainless steel capsules.

E.1 Security

Refer to Permit Attachment 3, Security.

E.1.1 Security Procedures and Equipment

Because WESF is located within the portion of the Hanford Facility controlled by the 24-hour surveillance system, [WAC 173-303-310](#) (2)(c) does not apply. In lieu of the signage described in Permit Attachment 3, entrances to portions of WESF used to manage waste are posted with a sign, in English, reading, *DANGER WASTE STORAGE - MAJOR CHEMICAL RISK: TOXIC*. Signs will be visible from all angles of approach, will be legible from a distance of at least 7.6 meters (24.9 feet) and meet the intent of [WAC 173-303-310](#).
