PART IV, CORRECTIVE ACTION
CONDITIONS, WASTE MANAGEMENT UNITS

UNIT DESCRIPTION

A waste management unit represents any location within the boundary of the Hanford Site that may require action to mitigate a potential environmental impact. This would include all solid waste management units (SWMUs) as specified under Resource Conservation and Recovery Act (RCRA) Section 3004(u). [Hanford Federal Facility Agreement and Consent Order (HFFACO) Action Plan Section 3.1.] As of October 2010, a total 3,312 waste management units had been identified for the Hanford site. This total includes sites not accepted as Waste Management Units, and sites pending confirmation as Waste Management Units. Waste management units include the following:

- Waste disposal units (including RCRA disposal units).
- Unplanned release units (including those resulting from spills).
- Inactive contaminated structures.
- RCRA treatment and storage units.
- Other storage areas.

Treatment, storage and disposal (TSDs) units are those units which will be permitted (for operation, closure, and/or postclosure care) and/or closed, under the Washington State Dangerous Waste Regulations [173-303 WAC]. [HFFACO Action Plan Section 3.2.] TSD units are not addressed by this chapter, but are addressed by unit-specific conditions in other chapters.

A past-practice unit is a waste management unit where wastes or substances (intentionally or unintentionally) have been disposed and that is not subject to regulation as a TSD unit. Due to the relatively large number of past-practice units at the Hanford Site, a process has been established for organizing these units into groups called operable units. The concept of operable units is to group the numerous units into manageable components for investigation and response action and to prioritize the cleanup work to be done at the Site. [HFFACO Action Plan Section 3.3.] The prioritization of cleanup work is done through the compliance schedule contained at HFFACO Appendix D.

The operable units are designated as either CERCLA Past Practice (CPP) or RCRA-CERCLA Past Practice (R-CPP). The operable units (waste management unit groupings) listed in HFFACO Appendix C are:
