PART VI, POSTCLOSURE GROUP 3 CONDITIONS

1325-N LIQUID WASTE DISPOSAL FACILITY

UNIT DESCRIPTION

The 1325-N Liquid Waste Disposal Facility (LWDF), also known by WIDS number 116-N-3, is an inactive Treatment, Storage, and Disposal (TSD) unit that has undergone closure activities. The 1325-N LWDF received waste from 1985 to 1991. The 1325-N LWDF was operated as a liquid waste disposal facility for radioactively mixed waste process and cooling waste water from N Reactor. The 1325-N LWDF also received dangerous waste from laboratories and may have received waste from spills within the N Reactor Building. The nature and quantity of mixed waste managed by the 1325-N LWDF is known and identified on the Part A Form.

In April 2005, DOE submitted to Ecology a certification of closure stating that the closure activities in the closure plan were completed. Remediation of groundwater contamination that resulted from the discharges of waste to 1325-N will be coordinated with final CERCLA remedial actions in the 100-N Area.

This permit sets forth the postclosure and ground water monitoring requirements for this unit.

LIST OF ADDENDA

Addendum A    Part A Form
Addendum B    Sampling and Analysis Plan – Reserved
Addendum C    Process Information – Reserved
Addendum D    Groundwater Monitoring Plan
Addendum E    Security Requirements - Reserved
Addendum F    Preparedness and Prevention – Reserved
Addendum G    Personnel Training
Addendum H    Closure Plan - Reserved
Addendum I    Inspection Schedule
Addendum J    Contingency Plan – Reserved
Addendum K    Postclosure Plan

DEFINITIONS

ACRONYMS

Reserved

VI.3.A  COMPLIANCE WITH PERMIT CONDITIONS

The Permittees will comply with all permit conditions in this Chapter and its addenda with respect to the applicable requirements in Part I and Part II of the Hanford Facility Dangerous Waste Permit.

VI.3.B  POST-CLOSURE CARE AND MAINTENANCE

VI.3.B.1 The Permittees will comply with the post-closure plan in Addendum K.

VI.3.B.2 The Permittees will submit a revised, update postclosure plan 6 months after the Record of Decision is issued for the 100-NR-1 Operable Unit.

VI.3.C  GENERAL WASTE MANAGEMENT REQUIREMENTS
VI.3.C.1 All waste analysis required by this chapter will be conducted according to the approved sampling and analysis plan.

VI.3.C.2 The Permittees will submit a revised sampling and analysis plan 60 days after the effective date of this permit.

VI.3.D GROUNDWATER MONITORING REQUIREMENTS FOR REGULATED UNITS

VI.3.D.1 The Permittees will comply with the interim status groundwater monitoring plan until a final status integrated groundwater monitoring plan, as required by Permit Condition VI.3.D.4, is incorporated into the Permit. The interim status groundwater monitoring plan for the 1325-N is contained in Addendum D to this Chapter (“Groundwater Monitoring Plan for the 1301 N, 1325 N, and 1324 N/NA Sites” (Hartman 1996b)).

VI.3.D.2 Addition to the requirements in VI.3.D.1, wells listed below shall at a minimum be sampled at the indicated rate for ICP metals (unfiltered) and anions.

VI.3.D.2.a 199-N-81 semiannually
VI.3.D.2.b 199-N-32 semiannually
VI.3.D.2.c 199-N-41 semiannually
VI.3.D.2.d 199-N-70 semiannually
VI.3.D.2.e 199-N-34 semiannually
VI.3.D.2.f 199-N-27 semiannually
VI.3.D.2.g New well “5” ternarily

VI.3.D.3 Permittees shall evaluate the effectiveness of the 100-NR-2 remedy for groundwater. Permittee shall summarize that evaluation in the Annual Hanford Site Groundwater Monitoring Report. The reporting requirement of WAC 173-303-645(11)(g) will be met by a single report that is included in the annual Hanford Site groundwater monitoring report, rather than two semiannual reports.

VI.3.D.4 Permittees shall submit a final status integrated groundwater monitoring plan 6 months after the Record of Decision for the 100-NR-1 Operable Unit is issued.

VI.3.E RECORDKEEPING AND REPORTING

The Permittees will place documentation of all work conducted pursuant to this Chapter including results of all monitoring, testing, or analytical work and associated quality assurance and quality control data in the Hanford Facility Operating Record, as required by Permit Condition II.I.2. [WAC 173-303-380]

VI.3.F SECURITY

The Permittees will post signs at points surrounding the 1325-N LWDF stating the following (or an equivalent legend): Danger – Unauthorized Personnel Keep Out. These signs will be written in English, legible from a distance of 7.6 meters (25 feet), and visible from all angles of approach. [WAC 173-303-310(2)(a)]

VI.3.G PREPAREDNESS AND PREVENTION

Reserved

VI.3.H CONTINGENCY PLAN

Reserved
VI.3.I INSPECTIONS

VI.3.I.1 The Permittees will follow the inspection schedule in Addendum I and Permit Condition II.X.

VI.3.I.2 In the event of any potential threats to human health or the environment, the Permittees will increase inspections to quarterly until the threats are removed.

VI.3.J TRAINING PLAN

The Permittees will comply with the training requirements as described in Permit Condition II.C (Personnel Training), Permit Attachment 5 (Hanford Facility Personnel Training Plan), and Addendum G (Personnel Training).
