E SECURITY

E.1 24-Hour Surveillance System

The 100 Area will remain an area controlled by RL for the foreseeable future. These areas will be under 24-hour surveillance by Hanford Patrol protective force personnel.

E.2 Barrier, Means to Control Entry, and Warning Signs

No direct exposure hazards remain at 183-H Solar Evaporation Basins. However, roadways to the unit and site access will remain administratively restricted to use by authorized personnel only. Posted federal warning signs restrict access to the 100-H Area from the Columbia River.
