1 **H1 INTRODUCTION**

2 Addendum H1 discusses closure activities for the FS-1 Outdoor Container Storage Area (FS-1 OCSA)  
3 Dangerous Waste Management Unit (DWMU).

4 **H1.1 Facility Contact Information**

5 The Hanford Facility, located in southeastern Washington State, is owned by the U.S. Government and is  
6 managed and operated by the U.S. Department of Energy (DOE). Dangerous waste and mixed waste  
7 (containing both dangerous and radioactive components) are generated and managed at the Hanford  
8 Facility. The FS-1 OCSA is part of the Hanford Facility, is owned by the U.S. Government, and is  
9 operated by DOE and its contractor CH2M Plateau Remediation Company. The contact information is as  
10 follows:

11 U.S. Department of Energy, Richland Operations Office  
12 P.O. Box 550  
13 Richland, WA 99352  
14 (509) 372-2400

15 CH2M Plateau Remediation Company  
16 P.O. Box 1600  
17 Richland, WA 99352  
18 (509) 376-0556

19 **H1.2 Closure Unit Group Description and History**

20 The FS-1 OCSA is a gravel covered area located along the south side of low-level burial ground 218-W-5  
21 Trench 34. In November 2004, the FS-1 OCSA was originally designated as a waste storage area. It was  
22 used for the temporary storage of non-mixed low-level waste (LLW) containers from the 300 Area prior  
23 to disposal. The temporary storage of LLW at the FS-1 OCSA ended in July 2005. From November  
24 2007 through September 2008, the FS-1 OCSA was used for the storage of LLW, mixed low-level waste,  
25 and *Toxic Substances Control Act of 1976* polychlorinated biphenyl LLW containers prior to disposal.  
26 No waste has been stored in the FS-1 OCSA since September of 2008.

27 **H1.3 Products and Production Processes**

28 The FS-1 OCSA does not produce products and does not have production processes. Therefore, this  
29 section is not applicable.

30 **H1.4 Dangerous Waste Management Unit**

31 FS-1 OCSA
