1 **5.0 PERSONNEL TRAINING DURING POST-CLOSURE**

2 This section describes the training of the groundwater sampling and analysis task leader and sampling
3 personnel required to complete post-closure care requirements as contained in this post-closure plan.

4 The training of the sampling and analysis task leader and sampling personnel will receive either classroom
5 instruction or on-the-job training. Sampling and analysis personnel will be trained to perform these
6 functions in accordance with the Hanford Analytical Services Quality Assurance Requirements Documents
7 (DOE-RL 1996c). A person successfully completing the required training courses will be qualified as a
8 groundwater sampler and/or task leader. All personnel will undergo training and at least an annual review
9 for required course.
