In addition, the existing SR 518 bridge over 42nd Avenue South will be widened, a noise wall will be constructed along the south shoulder of the SR 99 on-ramp, and a culvert will be lengthened. Reconfiguration of the stormwater drainage system will also be part of the proposed work and includes establishing drainage ditches and pipes, constructing a detention pond, and installing ecology embankments. The project will permanently impact 0.951 acres of wetlands and 0.260 acres of wetland buffer; and 0.075 acres of stream and 1.105 acres of stream buffer.
