Dear Mr. Burcar,

The City of Lake Stevens City Council took action under Ordinance No. 889 on April 22, 2013 by conditionally adopting eight Ecology Required Changes and proposing alternate language to two Ecology Required Changes (#6 and #9). In addition, the ordinance adopts eight additional revisions to the SMP. This letter is to officially transmit the required documents and materials to the Department of Ecology for processing and approval. The package contains:

1. A locally approved Addendum to the December 6, 2011 Cumulative Impacts Analysis for the City of Lake Stevens Shorelines: Lake Stevens, Catherine Creek, and Little Pilchuck Creek.
2. Ecology Appendix B Required Changes with City Responses
3. Ecology Appendix C Suggested Changes with City Responses and additional changes
4. Signed Ordinance No. 889

Minor code amendments to the City’s Land Use Code will occur following approval of the SMP by Ecology.

The City believes this packet satisfies the City’s requirements of the Shoreline Management Act to update the Shoreline Management Program and the conditions of the Department of Ecology Grant received by the City for this project.

Thank you for your continued support during our process. We greatly appreciated your participation in our public process and guidance to staff and elected officials. Please feel free to contact Karen Watkins at (425) 377-3221 or me at (425) 377-3239

Best Regards,

Rebecca Ableman
Planning and Community Development Director
