RE: Town of Woodway Draft Shoreline Master Program

Dear Ms. Lambert,

Attached is the Town of Woodway’s comprehensively updated Shoreline Master Program (SMP) dated August 2012. The purpose of this letter is to communicate the final version of the Town’s updated SMP submitted to the Department of Ecology (DOE) for review and approval.

As you may be aware, in February of this year the Woodway Town Council passed a resolution of intent to adopt a previous version of the SMP, dated November 2011, following DOE approval. However, as a result of additional revisions requested by DOE to be consistent with the Washington Administrative Code (WAC) related to the Shoreline Management Act, a revised SMP dated August 2012, has been prepared for your review and consideration.

Thus, the attached Woodway SMP which incorporates the revisions noted above, together with the Cumulative Impact Analysis and Restoration Plan, serves as the Town’s complete submittal to DOE. It is our understanding that these revised documents will be used in the department’s SMP review and approval process.

Thank you in advance for your timely review and the Town looks forward to the review and approval of our SMP in the immediate future.

Sincerely,

[Signature]

Eric Faison, Town Administrator
Town of Woodway
