

**Legend**

- Town Limits
- Sand Lance Spawning Areas
- Eelgrass - Continuous
- Eelgrass - Patchy
- Bald Eagle Nesting Territories
- Wetlands
- Wellhead Protection Areas
- Unstable Slopes

In addition to the features and habitats mapped, the following WDFW Priority Habitats are also present along the entire Coupeville shoreline:

- Surf Smelt Spawning Areas (WDFW)
- Estuarine system (WDFW)
- Hardshell Clam Beds (WDFW)

Other sensitive habitat includes eagle nests. More specific information on location of eagle's nests may be obtained from the Washington Department of Fish and Wildlife.

This map is to be used as a general guide for the Town, project applicants, and property owners, and may be continuously updated as new critical areas are identified. It is a reference only and does not provide a final critical area designation. Refer to CTC 16.34, the Critical Areas Ordinance, for designation criteria and regulatory implications of features indicated on this map.
