

**E-Waste Recycling Solutions
Evaluation Sheet for Subcommittee Members**

Model Under Review: August 2005 Option (attached)

How great a potential does this model have to address each of the criteria that the E-waste Subcommittee set forth: High (H), Medium (M) or Low (L)?

Criteria	High	Medium	Low
Promotes convenient, effective and responsible reuse & recycling throughout the State			
Creates long-term opportunities for Wa. Businesses			
Results in long-term system financing			
Solves environmental issues here without creating them somewhere else or violating international law			
Enables shared responsibilities & opportunities for different sectors of economy involved with electronics (business, government, charities, consumers)			
Supports a level playing field for businesses relative to one another & on national level			
Creates regulatory certainty for businesses			
Ensures environmentally sound end-of-life management			
Encourages design for reuse & recycling & DFE			
Supports conservation of natural resources			
Takes advantage of current infrastructure, where feasible			
Is available & effective throughout State & flexible for different parts of State			
Educates consumers regarding e-waste			
Supports protection of human health			
Has goals, accountabilities & performance standards			
Addresses the problems			
Is stand along for State and able to transition to national system			
Accommodates future changes in technology			
Prevents/avoids sham recycling			
Ensures that benefits for modifications or current system are commensurate with costs of modification.
