

09-10 Off Set Cycle Funding List By Region

Region	County	Recipient	Project Type	Project Title	Description	Total
CRO	Benton	Benton County	Organics	Organics Feasibility Study	Benton County will conduct a feasibility study and operations plan to eventually build a full scale Organic Waste Processing Facility (OWPF) to recover the 240,000 ton/year of organics waste going to the landfill.	\$75,000
CRO	Kittitas	Kittitas County Environmental Health	Solid Waste Enforcement	GPS Tracking & Enforcement	Kittitas County will purchase a GPS unit that will help them conduct more effective solid waste tracking, enforcement, management, and planning. This specific GPS unit will meet the accuracy and compatibility requirement of data collected by Public Works and Water Quality.	\$7,500
CRO	Kittitas	Kittitas County Solid Waste	Organics	Kittitas County Compost Facility Enhancement Project	Kittitas County will design, construct, operate and maintain additional curing pile capacity to receive organic material at the new county-wide composting facility. It is estimated to divert 6,000 tons of organic material year.	\$224,000
CRO	Okanogan	Okanogan County Health	Solid Waste Enforcement	Solid Waste Enforcement	Okanogan County will add 0.4 FTE to investigate and enforce illegal dumping and littering activities.	\$40,000
CRO	Yakima	Yakima County Public Services – Solid Waste Division	Organics	Organics Feasibility Study	Yakima County will conduct a feasibility study to determine location, partners, costs, market and supply for organics composting.	\$37,500
CRO	Yakima	Yakima County Public Services – Solid Waste Division	Green Building	Green-built Greenhouse	Yakima County will construct a demonstration built-green Greenhouse to promote green-building, recycling, organic waste collection, composting, and environmentally preferable purchasing.	\$15,000
ERO	Asotin	Asotin County Landfill	Organics	Beyond Waste-Organic and wood waste material collection	Asotin County will divert 2,500 tons of yard debris by providing a no cost option for Asotin County residents to accept organics and wood waste at the landfill. The material will be collected, weighed and hauled to a composting facility. Wood waste will be chipped and hauled off site for recycling or reuse.	\$206,500
ERO	Columbia	Columbia County	Waste Reduction and Recycling	Solid Waste and Moderate Risk Waste Planning	Columbia County will contract with a consultant to help with the update of the Columbia County Solid Waste Management Plan and the creation of the Columbia County Moderate Risk Waste (MRW) Management Plan.	\$60,000

ERO	Ferry	Ferry County Waste Management	Waste Reduction and Recycling	Solid Waste Management Plan Update	Ferry County would hire a consultant to assist with the work of reviewing and updating the Ferry County Solid Waste Management Plan and review, update and implement the Ferry County MRW Plan into the Ferry County Solid Waste Mangement Plan.	\$45,000
ERO	Grant	Grant County Solid Waste	Organics	Master Composter Training	Grant County Solid Waste will partner with the WSU Master Gardeners to provide Master Composter training in the fall of 2009. They will utilize experts from throughout the state to teach the classes offered during this training opportunity.	\$3,975
ERO	Grant	Grant County Solid Waste	MRW	Used Oil Collection Truck Purchase	Grant County Public Works/Solid Waste Division will divert 12,000 pounds of used oil annually through the replacement an aging used oil collection trailer. A used one ton truck soon to be surplusd from the Public Works central shop will be equipped with a flatbed, 500 gallon tank with baffles, and an electric pump. Special racks will be mounted on the flatbed that will allow employees to haul other recyclables at the same time as the oil.	\$11,250
ERO	Grant	Town of Coulee Dam	Organics	Wood Chipper	The Town of Coulee Dam will divert 500 tons of yard debris annually by purchasing a new 12" chipper, to convert municipal and residential organic material for ground cover, in our parks, and other areas as needed.	\$30,000
ERO	Lincoln	Lincoln County Public Works	Waste Reduction and Recycling	Solid Waste Plan Update	Lincoln County will continue to work with a consultant to help with the work of review and update to the Lincoln County Solid Waste Management Plan (SWMP) and, if necessary, review the need to update the Regional Local Hazardous Waste Management Plan (HWMP).	\$45,000
ERO	Pend Oreille	Pend Oreille Public Works	Waste Reduction and Recycling	Complete Recycling Facility upgrade and equipment purchase	Pend Oreille will purchase a used oil heater and 2,000 gallon oil tank to "recycle" the drums of used oil we collect and to provide some heat in the facility during the winter. They would further recycling expansion by purchasing mobile recycling containers with bins inside (for multiple commodity collection in one container) to be placed at outlying areas such as RV parks, the County fairgrounds, Park and other special events such as the rodeo. Additional funds would also pay for the equipment needed to process the mobile container commodities such as a magnetic separator, sorting conveyor, and a hydraulic container lift.	\$60,000

ERO	Spokane	Spokane Regional Health District	Solid Waste Enforcement	Additional Funding For Solid Waste Enforcement Of Illegal Dumping Activities	Spokane Regional Health District will offset expenses related to increased enforcement of solid waste violations and investigations of citizen solid waste complaints.	\$33,000
ERO	Stevens	Stevens County Department of Public Works	MRW	Statewide Electronics Waste Education Program	This program, on behalf of the entire state, will make funds available for local governments to develop their own education and outreach program or to use ready-made designs for brochures and handouts. This education will help to divert an estimated 13,000 tons of electronics from the landfill.	\$56,250
ERO	Walla Walla	Walla Walla County	Organics	Permanent Green Waste Processing and Recycling Facility	Walla Walla County will design and construct an impervious surface to allow the City of Walla Walla to obtain a permanent operating permit for processing green waste at Sudbury landfill. This project will also provide a recycling drop box area for non-organic recyclable material. This will result in 2,500 tons or organic and recyclable diversion.	\$487,500
ERO	Whitman	Whitman County Public Works	Organics	Town of Oakesdale Compost Project	The Town of Oakesdale will provide a facility for residents, the parks department, and the Oakesdale School District # 324 to recycle grass clippings, leaves, tree limbs and branches.	\$19,812
ERO	Whitman	Whitman County Public Works	Organics	City of Palouse-Compost Expansion Project	The City of Palouse will double the size of the compost facility and add equipment to help reduce the labor involved and divert 9 tons of organic material annually.	\$9,750
ERO	Whitman	Whitman County Public Works	Waste Reduction and Recycling	Move out and Pitch In	Whitman County will provide collection site containers around the student apartments and rental areas which would be utilized for the 2009 and 2010 Move Out process. This will divert 80 tons of usable items from the landfill to community organizations.	\$6,775
ERO	Whitman	Whitman County Public Works	Waste Reduction and Recycling	Expansion of Community Drop-Off Program for Mixed Metals Recycling - Town of Garfield	The Town of Garfield will increase accessibility and overall efficiency of their recycling drop off location by designing and paving a mixed metals recycling area. This will result in a 2 ton annual increase in the amount of material collected.	\$7,125
NWRO	King	City of Bothell	Organics	"Create Organics and Event Recycling-Parks" (Create Event Recycling and Organics Collection Program for Parks Department)	The City of Bothell will increase commercial organics recovery and recycling at City parks and sportsfields through outreach education, improved signage, staffing, and better simplified containers.	\$42,750

NWRO	King	City of Bothell	Organics	"Encourage Organics Recycling-Commercial" (Encourage and Promote a Commercial Organics Collection Program and Educate Businesses on Recycling Options Available)	The City of Bothell will provide technical assistance/outreach to 20 businesses for organics recycling and traditional recycling (emphasis on organics).	\$19,875
NWRO	King	City of Bothell	Organics	"Increasing Composting and Recycling In-House" (Increase Commercial Organics and Recycling collection at City facilities (in house))	The City of Bothell will start a commercial organics recovery program and increase the current recycling at City facilities through education, improved containers, promotional programs, and notifications.	\$14,625
NWRO	King	King County	Green Building	Shingles in Paving Demonstration	King County will demonstrate the use of post-consumer recycled asphalt shingles (RAS) in hot mix asphalt pavement on a roadway. This will increase the demand to recycle 150 tons of asphalt shingles.	\$75,000
NWRO	King	King County	Green Building	Green Building Program Guidance Document and Assistance to Suburban Cities in King County	King County will broaden it's Green Tools program's assistance to 15 suburban cities in King County by developing a "road map" guidance document and by providing trainings and outreach for Green Building.	\$100,000
NWRO	King	King County	MRW	Northwest Product Stewardship Council	The County would provide funds to the Northwest Product Stewardship Council for the day to day administration and coordination duties of the council. This includes overseeing the implementation of the NWPSC communications and outreach activities and policy work on mercury containing devices, paint, pharmaceuticals, tires, products with toxic chemicals and packaging. Funds would also be used to publicize the new manufacturer-funded Electronic Product Recycling program.	\$85,000
NWRO	King	Public Health Seattle & King County	Solid Waste Enforcement	Investigations of Permitted and Permit Exempt Recycling Facilities in King County under WAC 173-350-210;173-350-310	Public Health Seattle and King County will conduct site visits at approximately 146 recycling facilities and follow up visits/actions where warranted. They will focus their effort on facilities processing C&D or wood waste for materials recovery facilities.	\$196,143
NWRO	King	Snoqualmie	Organics	Yard Waste Program Enhancement	The City of Snoqualmie will increase the hours of their yard waste collection site, diverting an additional 50 to 75 tons of organic material. Additionally, they will increase public knowledge about composting and natural lawn care.	\$30,000

NWRO	King	Snoqualmie	Organics	North Bend Yard Waste Program Enhancement	The City of North Bend will return to a weekly yard waste collection schedule and educate the public about composting and natural yard care. These efforts will divert 25 tons of organic material annually.	\$30,000
NWRO	King	King County	Waste Reduction and Recycling	Local Hazardous Waste Plan Update with Beyond Waste Goals	King County will update their local hazardous waste management plan to incorporate Beyond Waste goals. (Last updated 1997)	\$120,000
NWRO	King	Seattle Public Utilities	Organics	Train the Trainer for Seattle Schools	Seattle Public Utilities will improve food waste collection at Seattle schools through providing teacher trainings, high school student trainings and by utilizing WA Green School program to divert 52 tons of food waste from disposal.	\$37,500
NWRO	King	Seattle Public Utilities	Green Building	Hybrid Deconstruction Center	Seattle Public Utilities will create a center for hybrid deconstruction and material reuse, develop curriculum and workforce training program based on deconstruction principles.	\$135,000
NWRO	King	Seattle Public Utilities	Organics	Multi-family Friends of Recycling and Composting (FORC) Training and Outreach	Seattle Public Utilities will expand an existing pilot with over 30 multi-family properties in order to divert 150 tons of food waste annually from the landfill and to develop effective outreach for limited English-speaking communities.	\$112,500
NWRO	Kitsap	Kitsap County Health Dept.	Solid Waste Enforcement	Solid Waste Complaint Response and Compliance, Solid Waste Enforcement Policy Development and Interagency Coordination	Kitsap County Health Department will investigate complaints of illegal dumping and improper solid waste handling as well as develop and implement solid waste policies, guidelines and regulations.	\$100,000
NWRO	San Juan	San Juan Public Works	Organics	Residential Food and Yard Waste Reduction	San Juan Public Works will expand their successful composting workshops and subsidize compost bins for residents, diverting 18 tons of organic material annually.	\$11,325
NWRO	San Juan	San Juan Public Works	Waste Reduction and Recycling	Agricultural Plastics Recycling	San Juan Public Works will provide opportunities for gardeners and farmers to recycle 22 tons of plastic nursery pots and flats, soil amendment bags, haybale wrap, and twine.	\$9,750

NWRO	Snohomish	Arlington	Organics	Commercial Food Waste Composting Program	The City of Arlington will educate restaurants, grocery stores, schools on best management practices for waste management, composting, recycling and management of fats, oils and grease. Businesses will have the opportunity to divert 98 tons of food waste annually.	\$15,000
NWRO	Snohomish	Everett	Organics	Commercial Food Waste Composting Program	The City of Everett will educate restaurants, grocery stores, schools on best management practices for waste management, composting, recycling and management of fats, oils and grease. Businesses will have the opportunity to divert 98 tons of food waste annually.	\$26,250
NWRO	Snohomish	Snohomish County Health District	Moderate Risk Waste	Youth Educational Outreach for Household Hazardous Waste Identification, Reduction and Disposal	Snohomish County, in collaboration with local school districts and agencies, will provide presentations to educate school-age children about household hazardous waste and how it affects health and environment.	\$30,000
NWRO	Snohomish	Snohomish County Health District	Solid Waste Enforcement	Feedstock Handling Practices at Solid Waste Handling Facilities	Snohomish County will examine handling practices of feedstock such as manure, demolition debris, and vector wastes at 40 facilities.	\$80,000
NWRO	Snohomish	Snohomish County SWMD	Waste Reduction and Recycling	Update Snohomish County Comp Solid Waste and Hazardous Waste Management plan to include BW, and Climate Change related components.	Snohomish County will update their Solid Waste and Hazardous Waste Management plan to include BW, and Climate Change related components. (Last update in 2000)	\$217,500
NWRO	Snohomish	Snohomish County SWMD	Organics	Non Residential Organics Collection	Snohomish County will collect and process 195 tons of organics material annually by signing up 200 commercial customers to their foodscrap collection services.	\$131,126
NWRO	Snohomish	Snohomish County SWMD	Moderate Risk Waste	Comprehensive Product Stewardship Program	Snohomish County will increase the number of private businesses, industries and services providing effective product stewardship programs through the participation in national and local programs to further product stewardship efforts around electronics, paint, mercury containing devices and other products of concern.	\$212,950

SWRO	Clallam	Clallam County	Green Building	Creating Markets for C&D	Clallam County will create markets by partnering with the cities of Port Angeles and Sequim. They will research successful programs in other counties and municipalities to reduce the quantity of building materials in the waste stream and conduct county-wide educational outreach and networking to facilitate and encourage local employment opportunities in this emerging field.	\$15,000
SWRO	Clark	Clark County Solid Waste	Waste Reduction and Recycling	Washington Green Schools	Washington Green Schools is a statewide initiative to provide a web-based, hands-on structure for schools to use to assess and take action in the categories of; WRR, toxics reduction and Indoor Air Quality, Transportation, Energy Efficiency, Water Quality.	\$187,500
SWRO	Clark	Clark County Solid Waste	Green Building	Sustainable Communities in Clark County	Clark County's Public agencies will work together to plan for what a sustainable "built" future might look like by identifying and marketing existing local green development and exploring how to integrate that into local planning and development over the next 15 years.	\$120,000
SWRO	Clark	Clark County Solid Waste	Organics	On-line Exchange for Commercially generated surplus food	Clark County will develop and launch a new on-line exchange for food rescue and recovery. Their food collection program have shown that a tremendous amount of food is heading to the compost program when it could be used to reduce hunger.	\$9,000
SWRO	Clark	Clark County Solid Waste	Organics	Home Grown Gardens	Clark County will teach 100 low income families the virtues of worm composting by providing worm bins and raised bed home gardens at no cost to qualifying participants.	\$67,500
SWRO	Cowlitz	Cowlitz County Public Works	Waste Reduction and Recycling	Update Moderate Risk Waste Management Plan	Update the existing 1990 Cowlitz County Moderate Risk Waste Plan to meet upcoming new moderate risk planning guidelines and address milestones defined in BW.	\$18,750
SWRO	Cowlitz	Cowlitz County Public Works	Organics	Screen for Yard Waste Composting Program	The County will purchase a vibratory screen with discharge conveyor to screen composted material generated at the Cowlitz County landfill compost facility in order to divert 508 tons of organic material annually.	\$96,000
SWRO	Jefferson	Jefferson County PH	Solid Waste Enforcement	Enforcing Solid Waste Codes	Jefferson County will increase their solid waste enforcement activities which include complaint response, inspections and permitting of facilities.	\$48,584

SWRO	Jefferson	Jefferson County PW	Organics	Food & Yard Debris Diversion Program	Jefferson County will provide staff time and support the efforts of a volunteer citizen led Community Gardens initiative, provide composting workshops and establish an elementary school campus gardening program at at least two school districts. It is estimated these efforts will divert up to 200 tons of organic material annually.	\$74,246
SWRO	Lewis	Lewis County	Moderate Risk Waste	Paint processing equipment improvements	The Lewis County will increase their paint processing efficiency by purchasing a can crusher and a mixer/filter machine. This would improve their give-away paint and offset the impacts of paint disposal.	\$15,000
SWRO	Mason	Mason County	Green Building	MRW Facility	Mason County will expand the capacity of their Moderate Risk Waste Facility using green building techniques and expand services available and material collected.	\$96,438
SWRO	Mason	Mason County	Organics	WA Corrections Center On-site Food Waste Composting	Mason County will work with the prison to develop and implement an on-site, in-vessel food waste composting system. They will provide technical oversight and assistance.	\$123,850
SWRO	Mason	Mason County/City of Shelton	Organics	School Food Waste Composting	Mason County will work with the Director of Food Services to plan and implement vermicomposting or an in-vessel composter at two schools.	\$58,300
SWRO	Pierce	Tacoma Pierce County HD	Organics	Natural Yard Care Project	Tacoma Pierce County Health Department will increase awareness of natural yard care practices by providing demonstration sites, training opportunities for residents and through participation in the regional natural yard care campaign.	\$88,236
SWRO	Pierce	Tacoma Pierce County HD	Solid Waste Enforcement	Solid Waste Enforcement-Closed/Abandoned Landfill Evaluation	Pierce County will select 10 of the 31 known landfills closed prior to solid waste regulations and conduct more detailed landfill gas, groundwater and/or surface water monitoring.	\$44,681
SWRO	Skamania	Skamania County	Organics	Drop Box Recycling Construction to include Yard Waste Collection	Skamania County will construct a larger more convenient recycling area that will include a organic material recycling location. They will divert 2000 tons of recyclables and 1000 tons of organics annually.	\$53,572
SWRO	Thurston	City of Olympia	Organics	Zero Waste Public Events/Areas (Beyond Recycling to Organics)	The City of Olympia will expand their public event recycling program beyond traditional recycling including an upgrade of the existing collection infrastructure to include organics collection.	\$37,854

SWRO	Thurston	City of Olympia	Organics	Commercial Organics Collection	This project will increase commercial participation in the City's curbside food waste collection program, diverting 1000 tons of organic material annually.	\$11,625
SWRO	Thurston	Thurston Co WWM	Green Building	Green Building Awareness/Museum	Thurston County will develop & provide signage for the Hand's On Children's Museum new LEED building to highlight green building features to educate over 250,000 children and visitors.	\$6,000
SWRO	Thurston	Thurston Co WWM	Organics	Home Composting	Thurston County will provide compost workshops and sell 1,400 composting bins and to county residents, diverting 291 tons of organic material annually.	\$53,880
SWRO	Thurston	Thurston Co WWM	Green Building	C&D Waste Diversion Program and Green Building Incentive Study	Thurston County will implement permitting process incentives or requirements that will increase the reuse and recycling of building materials.	\$137,520
SWRO	Thurston	Thurston County PHSS	Moderate Risk Waste	Integrated Pest Management partnerships	Thurston County will promote least toxic and environmentally preferable options for pest/weed control through chemical reviews and subsequent Integrated Pest Management policy.	\$85,125
SWRO	Thurston	Thurston County PHSS	Solid Waste Enforcement	Illegal Dumping Prosecution	Thurston County will increase enforcement compliance by partnering with prosecuting attorney's office.	\$261,425

\$5,023,317
