

**Melissa Wittstruck, AICP, Economic Development Planner, City of Spokane Business & Development Services.**

Ms Wittstruck joined the City of Spokane in 2001, where she has worked in Neighborhood Planning, Critical Area regulation, and Shoreline Master Program Update. In 2007 she became program manager of Target Area Development under Business and Development Services, which includes brownfield redevelopment.

Recent projects include:

- West Quadrant Tax Increment Finance District
- University District Plan Implementation
- Downtown Plan Update
- North Bank Economic Development Planning
- North Foothills Employment Center Integrated Planning Grant

**John Means, Brownfields Program Planner, Washington State Department of Ecology**

Mr. Means joined the Department of Ecology Toxics Cleanup Program in 2006, where he has been responsible for brownfield policy and program development and manages the EPA State and Tribal Response Program (Brownfields) grant program. John brings a strong interdisciplinary perspective to his work that emphasizes the integration of remediation and reuse planning within the local ecological, social and economic context. He has over 18 years of project management in the private, public and non-profit sectors with a concentration in freshwater habitat restoration. John holds a master's degree in environmental studies with focus on brownfield policy and sustainable development.

**Dave Enos, Vice President, URS**

Mr. Enos is a licensed geologist/hydrogeologist and has over 22 years of experience conducting and managing environmental projects. He managed the first City of Spokane Brownfields assessment and was a key participant in leading that project to national recognition with the successful cleanup of the Kendall Yards site.

**Sharon Kophs, Project Manager, URS**

Ms. Kophs has in depth knowledge of brownfields requirements and funding scenarios from her experience managing the Brownfields Revolving Loan fund at the Department of Commerce. She is knowledgeable in the integrated planning process, has extensive experience in managing multiple teams simultaneously to reach a project goal, has an established working relationship with the Ecology Brownfields Program lead, and assisted the city with development of North Foothills Integrated Planning Grant application to Ecology.

**Russ Johnson, Vice President, CB Richard Ellis**

Russ is a respected 35-year veteran of the commercial real estate industry. He spent eight years with CBRE during the 1980's, spearheading many successful assignments and providing training and guidance for future CBRE professionals. His notable achievements have been focused in industrial park land development, leasing and sales. Most recently, Russ was member of the 2009 CBRE team that exclusively represented and sold the 13,000-acre Yellowstone Club in Big Sky, Montana.
